Any man with a title to normal health may hurl cheery defiance in the teeth of the weather, even in its wilder moods.

It's wholly a matter of blood current and tissue cells, and everybody knows that sturdiness and vigor in these regards depend largely on good, nourishing food.

Much of the food in the ordinary dietary is lacking in certain vitalizing elements which Nature has designed for sturdy growth and resistance to disease. Especially is this true of white bread and white flour foods, because in making flour white most of the energizing mineral phosphates of the grain are thrown out in the milling process.

These vital elements are retained in the scien-
