Bargain! A good business opportunity. Owing to other investments I am offering for sale my stock of general merchandise at Eagle Point. This is a well selected stock of staples only. In a good brick store, low insurance, moderate rent and the store is and always has been a good paying investment. Eagle Point is on the direct road to Crater Lake and in the most desirable and prosperous part of the Rogue river valley.

FRED J. HEATH, Owner.

Editor William B. Brower of the Rogue River Argus, was a Saturday visitor in the valley.

Archie Mears and Miss Edna Richardson, of Rogue River, were married Wednesday at Jacksonville. They will make their home in Edon Valley.

Mrs. T. G. Heine, president of the Arts and Crafts league of this city, will begin a course of lectures to members of the league on Friday evening, March 17, at the residence of Mrs. G. E. Johnson, 609 West Tenth street. The lecture to begin at 7:30. Mrs. Heine is a member of the International Art Society, Chicago, and is a master of the art subjects she will discuss. These lectures will be replete with interest to the lover of art and its development and members of the league are deluged over the opportunity to enjoy them.

Representative Valley, Democrat, his close friend, met him, and Bailey said they discussed the warning resolution situation.

While Mr. Bailey insisted that Mr. Bryan would take no active part in the fight, administration leaders saw in his presence cause for concern. Their interest was further aroused when it was learned that Mr. Bryan expects to return here tomorrow and remain until Monday night, when he speaks in Wilmington.

Classes in candy-making for the family sale were organized and conducted in the kitchen at the academy Wednesday afternoon and evening, and were unusually well attended.

The efficiency of teachers and pupils was attested by the quality and amount of candy sold Thursday evening.

After the recent Thursday evening the pupils of the school served a lunch of home-made cakes, candies, chocolate, sandwiches and ice cream by the sale of which they hoped to defray the incidental expenses of the retreat. The students worked devotedly and the manner in which they organized and co-operated must have fought these many valuable lessons for the needs of later life. They represented most heartily the generous participation of friends and relatives.

Said the Critic, "Give us TRACTION, without FRICTION!" MAKING the "Silvertown" Cord Tire, taught us a few lessons in the manufacture of lighter, cooler, more flexible and enduring FABRIC Tires. The "Silvertown" Tire, you know, gains its marvelous Speed (and the Coasting qualities that demonstrate its Speed) primarily through having only TWO layers of Cord, laid transversely. Of course, these TWO layers bend more readily than Five, Six, or Seven Layers of Fabric do (or of Cord would). But, we found it necessary, in order to conserve that flexibility (in the Two-cord construction), to put a Rubber Tread over it which was equally flexible, equally strong, and elastic enough to act as a sort of spring between the Earth and the Tire-casing, when Brakes were thrown on at stopping, or clutch thrown in at starting. So, we had to devise practically a new kind of Rubber, for this purpose, TWO YEARS AGO. And this new kind of Rubber Compound now does for GOODRICH Tires a work paralleling that done by the wonderful Alloys of Steel and Bronze in modern Motor Car construction. It multiplies Rubber Efficiency, for Tire purposes, while decreasing its Weight, and without increasing its Bulk, or its Cost to you. AS we cannot yet supply half the demand for "Silvertown Cord Tires" (until enough manufacturing equipment can be constructed) without additional charge, the highly efficient black Silvertown Rubber in all Goodrich FABRIC Tires for 1916. This makes GOODRICH Fabric Tires the most Resilient and Responsive-to-Power, the most Long-Lived and Lively, of all FABRIC Tires, at ANY price, without increasing their relative price to you. We call this new Silvertown Tread Compound by the name and brand of "Barefoot Rubber." Because it CLINGS to the pavement for the same sort of reason that your bare foot clings to a slippery floor, while being flexible, stretchy, springy, and light. TENACIOUS, resilient, enduring, this "Barefoot Rubber" you today get in all black-tread Goodrich Fabric Tires, Goodrich Motor-Cycle Tires, Goodrich Truck Tires, Goodrich Bicycle Tires, Goodrich Rubber Boots, Overshoes, Soles and Heels, and in none but GOODRICH products. Test out a pair of these moderately priced black-tread FABRIC Tires and see what results from the mixing of BRAINS with Rubber. THE B. F. GOODRICH CO. Akron, Ohio GOODRICH "BAREFOOT" Tires
