Those who travel the road from the city to the city reservoir are complaining somewhat sorely about the condition of that highway. It is largely on municipal ground. It is said that it is almost unsafe for auto travel. The road is rough almost the entire way from the end of the street. It is about this reservoir that the Greater Medford club is making extensive improvements and adding attractions to delight the tourists who will visit that point to obtain a charming view of the valley.

VERNON CASTLES AT THE PAGE

The performance of "The Whirl of Life" at the Page last evening under the auspices of the high school junior class, was attended by a large and enthusiastic audience, which enjoyed to the full the films showing the exquisite dancing of the famous Vernon Castles, and the almost human acting of their dog "Tell." The play is an exciting one in its incidents, and yet almost literally true to the actual events in the life romance of the noted dancers. Scenes in high society life, the stage, and the best known cabarets of New York and the old world, follow in rapid succession, showing their first meeting, the parental opposition to their love, their elopement, and their struggles against poverty and the machinations of a disappointed suitor, bent on their ruin as they essayed to establish themselves in the position they now occupy in the eyes of the amusement loving world. The dog figures prominently in several scenes, and his work is truly wonderful in the intelligence displayed by the faithful animal.

The play is written by Mr. Vernon Castle. It will be produced again this evening at the Page, and all who are interested in the junior class and who like a good show are urged to attend. Much credit is due to the enterprise of the young students who have undertaken this production, and their efforts deserve to be rewarded by a liberal patronage.

A special feature of the evening's entertainment was the graceful Dutch folk dances in costume, between the acts, by Miss Dorothy Wicks and Mr. Lloyd Williamson. Their work was excellent and greatly enjoyed by the audience.

Maxwell

Reliability

OUR absolute faith in the Maxwell car is due to two reasons: First, we have known that the Maxwell Company uses nothing in the entire car but the very best that money can buy. We have known that the steel is scientifically heat treated, that the car is built under the supervision of able engineers, that every car is rigidly tested many times before it leaves the factory.

Second, we have known that the big and well established company behind the car is building for the future, that they value a satisfied owner above everything else.

Now that the Maxwell has set the World's Motor Non-Stop Mileage Record, by travelling continuously for 44 days and nights—averaging 500 miles per day—you will understand the benefits you personally may derive from the Maxwell policy. Did you ever hear of any car going 22,000 miles without once stopping the engine, without any repairs or readjustments, with only one gallon of gasoline to every 22 miles?

There is no reason why you shouldn't have a reliable, serviceable and economical Maxwell car. The first cost is low, the operating cost is low and our pay-as-you-ride plan makes the purchase easy for everyone.

Let us see you about this now, before our allotment is exhausted.
