The Laurelhurst literary society held its closing meeting last Saturday evening. The members of the society prepared a two and one-half hour play, which was to have been given on an open-air stage with natural woodland surroundings, but as usual when such plans are made for a fixed date it rained, so the play was staged in the Brophy residence. Notwithstanding the steady downpour of rain and snow, the meeting was the best attended of any yet held, there being about eighty people present. The play was a comedy entitled, "A Pair of Country Kids." Cast of characters: The Country Kids, Hi Haskins (Bob Brophy), Trisix (Helen Parker); a Country Squire, Ezra Simpson (Frank Ditsworth, Jr.); the squire's adopted daughter, Alice Simpson (Hazel Ditsworth); detective, Jack Sharpe (James Peyton); the villain, the one who caused all the trouble, Dick Manning (Carl Richardson); Aunt Melinda, a withered hobe, but still on the matrimonial bush (Ruth A. Porter); Tug Smith, the villain's handy man (Earl Peyton); Chub, Tug Smith's pal (Stewart Ditsworth). Victrola music was furnished between acts.

The play was a grand success. After the play an impromptu program of vocal and instrumental music was rendered by members of the audience, after which a delicious supper was served. Most of the crowd remained until morning and enjoyed themselves with music and dancing. Everyone voted the whole affair a total success and entertain hopes of an early opening of the literary society next fall.

Persephon and Psyche win his sympathy in story while Aurora, beautiful goddess of dawn, dances before him—but Deodatus is not satisfied that this is the heart of the world, and with the muse of tragedy leaves the glade. ## IVORY AND BLUE MAIN COLORS IN BODOUR OF A "VAMPIRE"

(By THEDA BARA.)  
(Written especially for the Daily Mail Tribune.)

The bedroom of a vampire!  
The very phrase has a thousand thrills. One has a mental picture of a divan spread with tiger skins, black satin sheets and huge incense burners. It suggests a room where the light of day never penetrates and every corner shelters the memory of a soul torn from the body of an innocent.

With a very obliterating brush, my reader, sweep the surface of this untruthful canvas. There are other colors on the palette. We will outline the semblance of a real bedroom—the one in which I sleep.

The general tone is sapphire blue and old ivory. The sapphire blue is velvet. It hangs from my windows and doors, covers my bed, couch and cushions. The old ivory is furniture.

A large sapphire blue velvet rug, without design, is studded with white fox skins. At the side of my bed is a huge silky polar bear rug. Cobwebby lace, old ivory in tone, shrouds my window and filters the sunlight.

My two toilet sets are, I believe, unique. One, of fourteen pieces, is of amber monogrammed "T. B." in tiny brilliants. This was made for me in America and sent to me by a man of immense wealth who had been confined in a sanitarium by scheming relatives. He was successful in his third fight for freedom and eventually visited a motion picture theater—a product of the years during which he had been incarcerated. The feature that night was "A Fool There Was."

He was impressed by the wonder of moving pictures and the personality of the vampire woman. A month later I received the toilet set. I have never seen the giver.

### COMMERCIAL FERTILIZER IS LAUDED BY RANCHERS

A party of fifty land owners in the valley inspected the result of experiments with sulphur as a fertilizer yesterday afternoon under the direction of Professor F. C. Reimer of the Talent Experiment Station. In view of the projected railroad to the Blue Ledge mine the results were of especial interest, as by-products from the mine would supply almost unlimited quantities of fertilizer with sulphur as the active agent.

The first farm visited was that belonging to Mike Hanley on the Pacific Highway a few miles north of Medford, and the results there were typical of those throughout the valley. Alfalfa which had been treated with sulphur stuck out above the rest of the field planted at the same time but untreated, like warts on a pickle. In fact at first glance the plots

looked like strips of alfalfa in a stubble field. Experiments with superphosphates indicated that it is the sulphur in this fertilizer which gets the results, while the farmer has to pay for phosphates which are of little or no value.

Iron sulphide was also used and good results were attained. The commercial iron sulphide however has only 12 per cent sulphur while the iron sulphide at the Blue Ledge shows 37 per cent sulphur. According to Henry Callaghan this iron sulphide can be delivered in Medford if a railroad is built for \$10 a ton while the commercial variety costs \$100 per ton.

The members of the party were tremendously impressed by the trip and were most enthusiastic over the results of Professor Reimer's experiments. One member of the party, an experienced rancher said that if the Blue Ledge mine were opened the fertilizers alone would be worth a million dollars a year to the agriculturists of Jackson county.

**NEAR AND FAR SIGHT IN ONE PAIR OF GLASSES**

Can you see distant objects clearly through your reading glasses? Or are you compelled to take them off every time you look off at a distance? Then you need KRYPTOK Glasses. KRYPTOKS combine near and far sight in one solid lens. The lower part is adapted for close vision, the upper part for far vision.

## KRYPTOK GLASSES THE ONLY INVISIBLE BIFOCAL

The smooth, even surface of KRYPTOK Glasses is absolutely free from the vision-blurring lines, seams, or shoulders of old-fashioned bifocals. They cannot be distinguished from single vision lenses. Yet KRYPTOKS enable you to see both near and far objects with perfect clearness. We recommend KRYPTOKS because they are the only bifocals without lines or blur of any kind.
