Baking Helps

By Mrs. Nevada Briggs, Exponent of the Art of Baking, as taught by Mrs. Janet McKenzie Hill

Always sift flour and K C Baking Powder at least three times. The more sifting, the lighter the cake.

Remember that! To cream butter and sugar quickly, warm the sugar slightly. Beat yolks of eggs with rotary beater. Whip whites of eggs with flat spoon whip.

Water makes lighter cakes; milk makes richer cakes. To mix a cake, first cream butter and sugar thoroughly, then add yolks, if used. Then alternately add moisture and flour that has been sifted with baking powder and stir until smooth and glossy, adding egg whites after thoroughly mixing.

Always use K C Baking Powder. Biscuit Helps Always sift flour and K C Baking Powder at least three times. Have shortening cold and firm. Mix dough as soft as it can be handled. The softer dough goes into the oven, the lighter the biscuit when it comes out. It is easier for K C Baking Powder to do its work in soft than in stiff dough. Mix biscuits very little. Do not knead. Stir up with spoon or knife and press in shape to roll on floured board.

With K C Baking Powder results are sure and certain. Ask your grocer for K C.
