### On this Prodiem Process Rubber Tire

Wonderful new rubber that wears down as evenly as fine steel

The illustration above is a section from a Prodiem Process Tire that ran 9,467 miles on a heavy car. Note the thickness of tread still remaining.

Prodiem Process Rubber (the new tire tread stock used exclusively on Republic tires) is practically chip proof and cut proof. Thousands of miles of service leave its surface in perfect condition. Rotting of fabric and resultant blow-outs are reduced to a minimum. Think of what this means in tire bills.

Get a sample strip of Prodiem Process Rubber. Try to break it. Its wonderful tensile strength is but one of the reasons why Prodiem Process tires give such excellent service.
