

OHIO CONGRESSMAN M'KINLEY'S DISTRICT SUPPORTS WILSON

YOUNGSTOWN, Ohio, Oct. 12.—Former Republican congressman, James Kennedy, of Ohio, has for four successive terms represented McKinley's old district in congress, is now an earnest and enthusiastic advocate of President Wilson's re-election. Although a life-long republican, active in that party's councils in Ohio, he has publicly announced in a letter to the Youngstown Indicator his complete abandonment of the republican party and its national presidential candidate.

The letter tersely sets forth his reasons for his present course, and is a convincing and sweeping endorsement of President Wilson's action in the railroad crisis. It is in part as follows:

Admission 8 Hour Law.
"I think that the congressional action taken when the Adamson bill was passed is altogether the best piece of legislation that has been enacted by congress during my lifetime. It recognizes completely for the first time, the right of congress under the commerce clause of the constitution, to fully and completely regulate the nation's great highways. It recognizes the fact that the trainmen working for the railroad corporations are public servants, working directly for the public, and that the public pays their wages. The railroad corporations are only trustees also serving the public. And it for the first time asserts the right of the people to attend to the people's own business. Congress should fix the hours of labor, the compensation and the condition of employment of the public's own servants.

Is Public's Business.
"The regulation of the public's own roads is peculiarly the business of the people in America, and when the president referred the matter this act in itself was admirable and should be approved and sustained by every patriotic American regardless of former party affiliations. Every other question in this campaign dwindles into insignificance compared with this issue. Briefly stated, as I conceive it, it is: Shall the people at last be permitted to have something to say about that which is peculiarly the peoples own business, to-wit, Management and regulation of their public highways? The public furnishes every dollar of the money to pay both the wages of the railroad trainmen and the salaries of the railroad presidents, and the railroad president and the railroad conductor are both servants of the public.

"Our 'invisible government' is insulting the intelligence of the American people when it by all its special pleaders attempts, by appeals to prejudice, to tell us that there were some questions to dispute about the regulation of the railroads between the public trustees and the public servants, which ought to be submitted to arbitration, and I say again that the president's attitude was magnificent when he said to both of these parties: 'This is the public's own business, and the people by their legislative agents shall act on this matter.'

Belongs to Congress.
"Congress long ago should have taken charge and completely regulated the instruments of interstate commerce, and great highways of the nation between the cities. And this belated movement in the right direction must not be repudiated now by the people unless they expect to be slaves of the 'invisible Government' forever.

"It is with great reluctance that I am compelled to abandon the party with which I have been affiliated all my life, but a sense of duty compels me to take the position I have just indicated.

"I shall vote for Woodrow Wilson for president solely because he recognized fully the fact that the great instruments of interstate commerce should be regulated by the people acting through congress, and not by a labor union and an association of railroad president."
