The bill precoters, who have not registered, are vides that all proposed measures must allowed to sign petitions, but they be sent to the attorney general before must make oath that they are qualified voters, and this must be done be- licer must prepare the titles.

### EXPERT DECLARES CERTIFICATE OF BLUE LEDGE BELT MOST PROMISING

#### By W. W. WATSON,

The good opinion of those compe tent to form it on impartial consideration of all the evidence obtainable both favorable and adverse, is some thing to covet and to value. This logic applies to anything worthy of con templation.

Since careful consideration is be ing given to the great copper field so near to Medford, in conjunction with concerted effort to cause the mining world to know something of the information we have thus obtained, the good opinion of a disinferented per-son whose life has been devoted to public utility must obtain a certifimining and the profitable development, cate of necessity from the public seiof mineral wealth, both in its scien-tific and its practical plusses, brings is a meed of assurance of much utility, and it is believed that it will value.

#### Rhodes Enthused.

David Robert Rhodes, who recently came from San Bernardino, Cal., to The omendment that must be coninvestigate the Dine Ledge mining district, representing two mining syndicates on this visit, was unfortunate Buehtel, and it gives the commission in coming before the show had suf- power to require public utilities servficiently disappeared to permit more than a cusual inspection of that territory; but he found enough evidence of the existence of an immense mineralized area, attractively rich in copper, to enuse him to speak enthusiastically about it.

"I would not undertake to make a definite report on what you may or may not possess," said Mr. Rhodes, "but I am interested. You know, of the adjutant general, and under its course, what it is that interests a tainer. I found an immense mineral ized area in which some practical development has been made. Much of it, however, is in the prospecting stage. That which has been carried

eyond this condition is very interesteng, because it is very promising Some exposures leave no doubt of the existence of rich copper ore in great to pass up the river to the spawning ledges. The fast that old and sac-grounds, and it is believed that it will ledges. The fact that old and successful prospectors have located cores of claims and, by dust of hard this stream. effort and much hardship, have held

them for years, unwilling to look for ingthing better, should be taken into NEW INSURANCE enrelat account. "Those who know nothing about the

practical phases of mining have no right to doubt their judgment. And I found many of these. The width of the four-mile strip, extending from northeast to southwest, through which

these ledges parallel each other at intervals of a few hundred feet, massing entirely through the range, tapped on one side by the Blue Ledge camp body, the amendments were concurred and on the other by the Happy Camp in and it is now ready for the govergroup, sixteen miles distant, is a somewhat unusual condition. That alone would make a large field of opmensure: eration.

#### Promising Prospects.

"In that area, on the Applegate side of the range, I made a hurried sketch of the physical aeighborship of Blue Ledge, Sallivan, Bloomfield. Cook & Green, St. Albans, First Na tional, Blue Canyon, Donkey, Iglo, Morris, Sam's Ledge, Blue Extension, Copper King and New London. On some of these calinas much has been accomplished inexcensively; that is to say that since it is generally a tunnel proposition, not much work been required to make an attractive showing as a prospect. The general character of the formation through out the entire district, on the Medford

side, indicates a compact mineralization. I assume that is the reast tat bill today on a point of order by on so many of the prospectors have

SALEM, Or., Feb. 16.-Four constructive measures—the tenure in of-fice bill for teachers, the certificate of necessity bill, the Willamette fish When the resolution went over from ports for Europe to undergo examibill and the military code-have passed the house. All have passed the senate, and as soon as the senate cousurs in an amendment to the certific By holding it in committee until he cate of necessity bill, all four will be ready for the netion of the governor. The other three passed the house without amendments,

The senate committee on municipal vice commission before entering has iness in a field already served by r

sound the death knell of rumous conpetition that has prevailed more or less in the stafe between utilities. curred in by the senate was suggest ed by Public Service Commissioner ing a field to extend their services when it is for the public welfare. The military code was the product

of the deliberations of the joint con mittee of the two houses on military affairs and it is designed to eliminate polities from the national guard and to put that organization on an efficircley hasis. The code does not change the present qualifications of

provisions it would be impossible to call the guard out on strike duty save in extreme cases. Senator Gill is the father of the Willamette fish bill and its passage was contested by Representative Brownell. It prohibits commercial fishing above Stony Rock, near Oswego. Its object is to permit salmon contribute vastly to game fishing in

SALEM, Or., Feb. 16.- The new insurance code, amended by the house after it came from the senate, was yesterday approved by the uppe-

nor's action. Insurance Commi sioner Wells is well pleased with the code. He said in commenting on the "The legi-lature, in my opinion, ha

enacted in this insurance code a law for the protection of the people that will mean more to them than 30113 other measure they have enneted."

WASHINGTON, Feb. 16. Propo ed increased po-tage rates on newpapers and magazines and provision for 1 cent postage on drop letters finally were eliminated from the pos-Senator Lodge that they had no pla on such a measure under the senate dence that they are partners in a rules. This action is expected to end Foots Creek. the tight at this seasion for the provisions;
