Prodiun Process

TIRES

A Tire of Most Wonderful Heat and Wear Resisting Qualities

Made in the Famous Staggard and Plain Treads

The combination of Prodiun Process Rubber with the famous Republic Non-Skid Staggard Tread gives a tire that satisfies

The strong studs of the Staggard Tread grip the ground like fingers, giving the greatest possible traction and reducing skidding to a minimum.

The Prodiun Process Rubber wears down evenly, like fine steel; resists heat remarkably, is as near cut-proof as it is possible to make rubber, and gives the utmost possible in mileage.

When you see a Republic Tire, you will usually find at least three others, or if there are other makes they are old ones. After a man tries out a Republic his new tires thereafter will almost invariably be Republics. That motorist has sailed through the stormy sea of doubt and anchored safe in the harbor of decision. There's no question in his mind now. When you ask him which are the best tires he will say without hesitation, "Republics, of course." He may change cars. There are many types and many prices of cars, and what is best for him today may not be tomorrow. But for him there's only one tire for every car. Ask any man who uses Republic Tires. Ask him why he is so positive. **REPUBLIC TIRES** and Republic Black-Line-Red Inner Tubes are made with a purpose. Back of every Republic Tire is an ideal manufacture that has never wavered.
