### NOW IS TIME FOR BOYS AND GIRLS TO PLANT GARDENS

Supervisor Peterson has issued the following circular to the school children of Jackson county regarding the prizes to be awarded at the county fair for agricultural displays: To Girls and Boys:

In making preparation for the fair of the coming season, we should keep in mind something more than the mere matter of making exhibits, something more than the winning of a prize. There are several points to keep in mind. The following ones are listed in what is considered the order of their importance: The first, no doubt, should be given more consideration than all the others combined:

1. We should work to produce those things which will be of most use to our country. We know that every true American boy and girl wants to do his or her part at this time. There was never a greater opportunity to do patriotic service than that which confronts us now.
2. We should bear in mind that if we produce the things which are needed, we shall find a ready market for them at good prices. But even if we produce only for our own home use, we are reducing our own home expenses and at the same time saving a certain amount of drain from the general stock of supplies.
3. Anyone who produces something of real value is sure to gain knowledge, training and habits that will be of inestimable value to him all the rest of his life.
4. Those who do real service as producers will receive recognition as being persons who are not only good, but good for something. They themselves will have the satisfaction of increased self-esteem.
5. Prizes will be awarded, each of which will be a recognition of worthy achievement, and many of the prizes will have considerable intrinsic value.

The prize list for the juvenile department of the Jackson county fair for this year will probably be based largely on the following items:
