WILL INSTRUCT YOU HOW TO MANAGE YOUR GARDEN

"The Hen in Town"; "The Home

SEPTEMBER MORN COMING TO PAGE FRIDAY, MAY 11

"September Morn," the whirligig musical delight from the LaSalle opera house, Chicago, comes to the Page May 11 with the jolly comedian William Moore, always a welcome entertainer and associated with this brilliant fellow of nimble legs and funny faces are many happy comedy players, including Maud K. Williams, Ruth Wilkins, James Baber, J. J. Patton, Billie Murphy, Leslie Jones and other talented principals who help to keep the fun moving at a rapid fire pace. The company numbers nearly fifty and the pretty chorus of girls have much to do with "putting over" the tuneful jingles and attractively arranged ensembles. The dances are many and have to do with the famous tango and graceful hesitation waltz movements, which are the rage of the leading music halls and cabarets.

"September Morn" is a musical finale of romances, comedy and joy and Ruth Wilkins, "The American Gaby Dealy," is a hit as "Argentina" in this burlesque show.

The producers, who have a long string of theatrical successes to their credit, have given this delightful success an extremely elaborate mounting, both in regards to scenic effects and costumes.

Vegetable Garden": "Steps in Cold Pack Method of Canning"; "Foods and Their Functions"; "Grow Food—Use All the Land." They were obtained from the agricultural college at Corvallis and are authoritative. They contain valuable instruction to gardeners generally. They will tell you, not only how most profitably to raise garden plants, but how to prepare them for the table and how to eat them.

Superintendent Dressler has been sought by many for information about the cost of city water. The water committee has assured him that that matter will soon be adjusted in a spirit in harmony with the present war preparedness program everywhere. The cost of water will be a small item.

How to use the water conservatively is another matter. It concerns scientific irrigation. That is a feature of the work that everybody who cultivates the soil, either in the backyard or on a plantation, should know something about.

The soil should be kept reasonably moist all the time. It should not be permitted to dry thoroughly to a depth of five or six inches and then flooded in the hope of overcoming the loss sustained. The plants of the garden and field cannot consume solids. Moisture in the soil is necessary to produce plant food, without which the plants will starve. They must have that food regularly. To starve them and glut them alternately will produce a poor plant, just as it will produce a poor hog or a poor chicken—or a poor person.

There should be at least 13 per cent of moisture in the garden soil constantly to produce the best results. A little experience will enable the gardener to tell about the degree of moisture without making any test.

ELKS PROVIDE FREE BATHS FOR MILITIA BOYS

Company I will remain in Medford and the efforts of business men of Ashland to have the headquarters of the company removed to the army in that city have been fought. This situation was practically settled when the Medford lodge of Elks offered to fix up shower baths in the basement of the Elks club house for the free use of the company.

When it became known that the members of the company were greatly dissatisfied with their present headquarters in the Cuthbert building because of the lack of bathing facilities, Ashland got busy and offered Captain Grover Todd the free use of the Ashland armory, which is equipped with shower baths and kitchen and dining facilities.

The visiting soldiers are pleased that they are to remain here as they like Medford and many of them have formed strong friendships here, some of them very tender ones. It will be several days yet before the shower baths are installed in the clubhouse, and in the meantime the Company I boys will make use of the baths at

the Holland hotel, which have been tendered the company free of charge by the hotel management. Approximately fifty men of the company are in Medford all the time, the others being scattered out on duty guarding railroad bridges, trestles, tunnels and water tanks all the way from the other side of the Siskiyou to Roseburg and beyond. Each man is on guard and patrol duty eight hours, and then is off duty in Medford for 16 hours.

CHEAP WATER RATE FOR IRRIGATING LOTS

There seems to be a misunderstanding as to the tentative price the city council plans to charge for water for irrigating the food preparedness lots and separate gardens throughout the city.

The rate being considered by the council is four-tenths of a mill per square foot and not four mills as reported. At this rate the cost of irrigating an ordinary lot for the season would be about \$2, quite a decrease from the present rate of \$1.50 a month. The water committee of the council now has the ordinance in charge and will have it ready for passage at the next meeting of the council.

PRINCE OF WALES TO ASK HAND OF PRINCESS MAUD

LONDON, May 5.—Prince Edward Albert of Wales, heir apparent to the British throne, has answered for himself the question whom he will marry, according to the National News, a London weekly. The News says the prince has decided he will ask for the hand of his first cousin, Princess Maud, the youngest daughter of the princess royal and sister to Princess Arthur of Connaught. The young princess is 14 months older than the prince, who is 22. Her father, the Duke of Fife, was the closest personal friend of the late King Edward.

The report of the National News contradicts the rumor current some time ago that the prince sought the hand of Princess Yolanda, eldest daughter of King Victor Emmanuel of Italy. Recently London newspapers, perhaps influenced by the downfall of the Russian aristocracy and the American stand against Germany's separate royal caste, have been urging that the old system under which kings' choice mates for themselves or their heirs among the daughters of their own nobility should be revived.
