A. J. VANCE, Captain.

PERSHING'S ARMY LANDS

(Continued from page 1.)

The "Marseillaise" as the American colors were hoisted to their staffs.

Officially Welcomed.

The town soon took on a holiday appearance and before the day was over scores of American flags were flying along with the tri-color of France over public buildings and private homes.

Delegations of American army officers from Paris and American naval men from elsewhere were present with French military men of high rank and a similar representation from the French navy to receive the new fighting forces of the allies.

Land was first sighted from the transports on Monday night, an exciting trip through the submarine zone. Frequent warnings of submarines operating in the expedition's course were received during the last few days of the voyage, and the passage through the war zone was made of high speed.

Ideal Weather Prevailed.

The men were prepared for every emergency during this period. Boats and lifeboats were placed so as to be quickly available, the watches at all the lookout stations were heavily re-intoled.

Weather conditions during the entire voyage were ideal, and the men arrived in excellent health. The days were warm and the nights cool and comfortable, while the sea was unusually smooth. Very few cases of sickness or other illness was reported.

A FRENCH SEAPORT, Thursday, June 28.—American troops—General Pershing, the American commander; General Pelletier, representing French general headquarters, and a small staff arrived here early this morning from Paris. A pouring rain and the early hour kept all but a few lighthearted enthusiastic townspeople at home, but those who were on hand welcomed the general warmly.

General Pershing will confer with

General — this morning. He will then visit Rear Admiral Gleaves on the flagship this afternoon.

FRANCE TO TAX ALL PURCHASES

PARIS, June 29.—The new finance bill of Joseph Thierry, minister of finance will, if voted by parliament, add about 1,500,000,000 francs a year to France's income. The most radical of the new features is a tax upon expenditures of individuals which is to be collected by the merchants who, when sales are made, will add on behalf of the government 5 per cent on all articles classed as indispensable, and 10 per cent on all luxuries.

A tax of three-tenths of one per cent is proposed on all inheritances and donations exceeding in value 2,000 francs. It is to be paid annually during the lifetime of heirs or beneficiaries.

CONFEREES SEEK AN END TO MINERS STRIKE IN BUTTE

BUTTE, Mont., June 29.—A committee representing the striking electricians met officials of the Montana Power company today in an effort to bring about a settlement of the electrician's strike against the power company for higher pay. The electricians also demanded that the mining companies grant the demands of metal mine workers who want \$6 a day and improved working conditions.

The electricians presented their demands and the conference adjourned until this afternoon. It was announced that E. J. McNulty, international president of the electricians, has started for Butte to participate in the conference. W. H. Rodgers, federal mediator, is awaiting the arrival of John McBride, another mediator, who is due here tomorrow from Salt Lake City.

The mines continued operation with a slightly increased force. Organizers of international unions who have arrived here are attempting, it was said, to organize the metal mine workers union so that it can be recognized by the American Federation of Labor. So far the union has not sought affiliation. Mining companies allege that it is controlled by the Industrial Workers of the World. It was authoritatively stated that Chas. H. Moyer, now head of the International Mine, Mill and Smeltersmen, is but a short distance from Butte awaiting developments.

BRITISH WIN COAL MINES (Continued from Page One.)

levated by shell fire, but were repulsed elsewhere.

Object in Doubt.

One of the most interesting sections of the European fighting front just now is the Verdun region, where a series of violent German attacks is taking place.

Whether these assaults are any

NEUTRALS MAY NOT SUPPLY GERMAN MARKETS

WASHINGTON, June 30.—America's export policy will be determined by President Wilson only after a most careful study of the subject in all its international aspects.

After the problem has been gone over at today's cabinet meeting, it was disclosed that the first presidential proclamation putting certain commodities under government control probably will not be issued for some days.

Many complications are presented. The administration, firm in its intention to check the movement of supplies from the European neutral countries to Germany, is anxious at the same time that no injustice be done to neutrals. It is realized that any program for rationing opens itself to many abuses.

Switzerland, for instance, receives its entire coal supply from Germany in exchange for home produced food products. If the United States declines to grant license for German exports to Switzerland and unless the Swiss cease exporting food products to Germany, Switzerland will have to go through the winter with an inadequate coal supply.

The question of tonnage, too, presents a complicated problem. Coal probably will be put under Heense in the first proclamation. As bunker coal will be licensed, this arrangement will give the United States and England together a firm control of both allied and neutral shipping.

The disposal of neutral tonnage and a score of other complexities must be worked out before a definite policy is adopted. Plans for diverting Japan's tonnage to trans-Atlantic service are to be considered before a final decision is made as to a program.
