J. C. Burns of Applegate and F. A. Wilfert, mining man who makes headquarters in Medford, returned last night from a several months sojourn in Richmond, Virginia, their former home. Mr. Burns owns mining property along the Applegate river. "There is big prosperity in an agricultural sense thru the south and middle west," said Mr. Burns today. "The greatest prosperity seems to be from Kansas City this way. The wheat and potato crops are simply immense. While passing thru Kansas we saw evidence of the destructive work being carried on by the I. W. W. From the train we saw a great field of grain burning. The train crew told us that it had been set on fire by the I. W. W. and that the latter had started a number of similar fires in that territory."

C. H. Williams, who has spent the past two years with a company near Chico, California, returned home Wednesday evening for an indefinite stay. He says the Sacramento valley is almost unendurable right now because of the heat, and that it is a relief to get into the Rogue River valley.

BRITISH BOMBS DO DAMAGE TO THE TURKS

LONDON, July 11.—According to brief telegraphic accounts of the British airships bombarding operations at Constantinople, the attack was one of the most successful of the kind during the war. The airplanes were over the city nearly a half hour.

Eye Strain Is Serious

Usually the sufferer does not complain of poor vision but suffers from distressing headaches and nerve troubles of various kinds, all of which arise from the eyes.

carefully picking out their marks and descending to an altitude of less than 300 yards for release of bombs.

The Goeben, which recently has been annoyingly active against the Russians, was the center of the attack with an entirely satisfactory result, and it is safe to presume she will be out of action several months.

The war office, situated on a hill, was also an easy target. Among the damaged enemy ships was a converted liner, which was used as the headquarters of the German staff.

ON LEMBERG IS THE SPIRIT OF THE RUSSIANS

PETROGRAD, July 12.—In the capture of Halicz, the Russian revolutionary army has reached in a single move the objective fought for so stubbornly, but without success, by General Brusiloff's triumphant forces of last summer in a long and arduous campaign. This feat means the definite piercing of the Austro-German lines on a broad front, and not merely a local penetration, which was accomplished by the first Russian victory west of Tarnopol.

Hundred Mile Front

The activity of the Russian armies now spreads from Tarnopol to the Carpathians and they are steadily pushing forward on a continuous front of more than 100 miles. Lemberg is now open to attack from Halicz. It is also likely that the Austrian line which has long been based on the Galia Ljpa river, will be forced to retire, and as the Russian movement develops in the direction of Lemberg, it is sure to have an effect on the situation in the Kovel-Vladimir-Volynsk region.

Lemberg the Prize

Having broken the strong Austro-German line in the vicinity of Halicz, the Russians are pushing forward from Halicz toward Lemberg, the capital of Galicia, and from Stanislaw, the line of the Dniester river.

After the capture of Halicz, on the front from Halicz to Solotvin, about 30 miles to the south, General Kornil-

off forced the Austro-Germans to continue their retreat. In their advance from Halicz the Russians forced the retreating enemy across the Lomnica and occupied two towns on the western bank of the river. The next natural barrier is the river Stoka about six miles west of the Lomnica.

Russians Extend Line

South and west of Stanislaw the Russians have reached the Postecz-Lesivka-Kamarcz line, the central point of which, Lesivka, is four miles west of the river Bystrza. This line is about seven miles east of Kaluzs, the nearest large town west of Stanislaw, and which is situated on the Stoka river, on the extension of the Russian fighting line to the Solotvin battle ground in the foothills of the Carpathians.

On Tuesday the Russians captured 2,000 more prisoners and 30 more guns, bringing their total captured from July 8 to 10 to more than 10,000 officers and men, and 80 guns. A large amount of machine guns and war material also was taken.

DRAFT DRAWING IS POSTPONED ONE WEEK

WASHINGTON, July 12.—Postponement until next week of the drawing of the numbers of the men who will be called for the national army seemed probable today, when it became evident that states are not completing organization of their district exemption boards as rapidly as war department officials had hoped.

I. W. W. TO BE INTERNED.

phone message at 2 o'clock this afternoon from Douglas said the train load of I. W. W. members deported from Bisbee passed thru there at 1:45 o'clock en route to Columbus, N. M., where they will be placed in a camp under the supervision of federal officials.

The train consisted of 27 cars. Attorney W. B. Cleary of Bisbee was among those deported. Men on the

train confirmed the report of two killing this morning at Bisbee.

PHOENIX, Ariz., July 12.—The entire town of Bisbee has suspended business and the Citizens' Protective league, numbering 1500 fully armed, has rounded up 1000 members of the Industrial Workers of the World, have searched them and are now loading them in freight and cattle cars and will deport them at 11 o'clock.

The work of deporting the Industrial Workers, who are regarded as the disturbing element in Bisbee, is being done thoroughly and in a systematic manner. The Citizens Protective league, which is doing it, is an organization of citizens, business men, mine operators and miners not affiliated with the Industrial Workers of the World. It is stated practically all of the members of the organization have been deputized by the sheriff.

Greatly outnumbered, those members of the Industrial Workers of the World who had not left town were "rounded up" in the city baseball park. There a guard was maintained and as fast as the men were brought in they were searched for weapons and the little red cards showing their membership in the Industrial Workers of the World organization.

Nearby on a siding cattle and box cars were standing and the men were taken from the ball park to the cars, where other guards saw to it that they remained. This train, which will be composed of more than a dozen cars, it was stated, was to be sent out of town at 11 o'clock. Leaders of the Citizens' Protective league refused to give its destination.

FEDERAL TIRES Double Cable Base Traffic Tread Rugged Tread. Tread design perhaps has little influence on your choice of tires. Yet efficient skid prevention is a big advantage. RED CROWN GASOLINE Easy Starting. Low boiling points do it—the first links in a continuous chain of boiling points. Low boiling points for easy starting, medium boiling points for quick and smooth acceleration, and high boiling points for power and mileage. Red Crown is a straight-distilled gasoline. Hence there's a continuous chain of boiling points, gradually rising from low to high. Mixtures cannot have a continuous chain of boiling points. That's why mixtures cannot be as good motor fuel as pure straight-run gasoline. And that's also why the gravity test for gasoline is worthless—gravity tells nothing at all about boiling points, the only real test of gasoline quality. To get certain of getting real gasoline, and not a mixture, fill with RED CROWN the Gasoline of Quality. STANDARD OIL COMPANY (CALIFORNIA)
