Whisky and Beer Controversy Simply bill becomes a law, if it ever does. to Delay Passage of Food Bill and Permit Food Speculators to Gobble Up Wheat and Grain Crops of Na- there. tion and Reap Fortunes.

#### By H. N. RICKEY, WASHINGTON, July 17. - For

many weeks now-to be exact since this country as to justify the high the ordinance will be enforced to the May 22-the congress of the United prices, in many cases prohibitive to letter without fear or favor. States, both the senate and the house, has been presenting to the people of which if it were not so tragic might of agriculture this week this country and the world a spectacle be described as the most utterly ridiculous in the history of national and legislative bodies.

On the date named, the Lever bill popularly known as the food bill, was introduced in the house. The purpose of this bill was to relieve the hundred and ten million people of the United States from the all but unbearable burden of the high cost of living.

It provided for giving the president authority to name a food administrator charged with the vitally important task of stimulating the production regulating the distribution of and stopping the speculation in food.

Prepared by Experts.

This bill was prepared with great care as the result of the best thought of the greatest experts in the government service. Before it was introduced it was O. K.'ed by President Wilson and by Herbert C. Hoover who had hurried from London to volunteer his great abilities as food administrator.

President Wilson had accepted lioover's services by cable in the be-Hef-which was shared by every man who had followed Hoover's career since the beginning of the European war-that he was the best fitted man in the whole world for the job.

There was absolutely no good reason why the food bill should not have been passed by congress and become a law by the president's signature within a week from the day it was introduced.

There is not the shadow of a doubt that if this had been done, every family in the United States would have felt the effects almost immediately, in the reduced cost of food necessities. Prohibition Fight a Fake.

That is precisely why the food bill was not passed within a week; why it was not passed within a week; why it IRISH CONVENTION it is scarcely recognizable; why it is still being buffeted about in congress. why, for the past month, the debate has degenerated into a cat and dog fight on the liquor question.

At the time the liquor issue was interjected into the discussion, it Regent house of Trinity college, ac seemed as if the food bill was about to be passed.

That was why the liquor fight started. The food speculators and hoarders, passed, the would be forced to stop passed, they wiuld be forced to stop people, saved themselves by subtis starting the fight over whisky and

beer. Every one who has sat in the gallory of either the senate or the house and listened to the drool about whis ky and beer which is miscalled debate cannot but have been impressed by the utter lack of sincerity of 90 per cent of it.

Betraving the People.

sumer was to get the protection he as entitled to. Congress paid no more attention to AUTOISTS MUST was entitled to Hoover's statement, which was really an eloquent plea for action, than tho he had talked in a strange language which they did not understand. July 1 came and went and the whis-ky and beer debate continued without interruption. In the meantime the greater part of

this year's harvest has fallen into the foul jaws of the food sharks and the est of it will be there before the food

It is going to be about ten times as hard to catch the sharks and get the food out of their bellies as it would lights, have been to keep it from getting

No Lack of Food.

That is why congress is still debating about whisky and beer; why it will continue to do so until the sharks' beliles are full.

There is no such lack of food in familles of small incomes. This is proved by a statement on cold storage holdings given out by the department state law which goes into effect Au-

The statement, compiled from re gon. ports received from about 250 cold lights on all cars must be so arranged storage plants thruout the country, that the center rays strike the ground shows there are more butter, eggs, cheese, frozen and cured meats, lard, car, except that when safety and conand frozen poultry in the refrigerating establishments than ever before dimmed.

in the history of the nation. The law of supply and demand no longer obtains. With these great reserves of food being held for speculative purposes, the cost of food is higher than during the civil war!

Here are some startling figuresmark them well, and when you mar them, think of congress, that, know ing them, refuses you relief:

The frozen poultry now in cold storage totals fifty-four million pounds, an increase of nearly 500 per cent over the quantity held in the refrigeration plants a year ago.

(Is it any wonder that chicken has become an unattainable luxury in millions of American homes?)

There are about thirty million ounds of cured beef in cold storage an increase of 75 per cent over a year ago. There are about ninety million pounds of frozen beef now in cold storage, or about 30 per cent more than last year,

Isn't it true that while your con gress has been holding up the food in the mines soon. bill with a fake debate about whisky and beer, the food speculators and hoarders have been grabbing all the food they can get hold of and making you pay outrageous prices? Just one word more:

In America, the greatest wheat growing country in the world, whea costs the consumer more than in France, England, Germany or Italy And what is true of wheat is equally true of many other food staples.

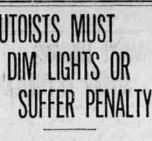

ford Saturday.

MEETS ON JULY 25 DUBLIN, July 17 .- The national onvention will assemble July 25 in cording to official announcement The chief secretary for Ireland, H. E Duke, will preside until the conven tion elects its own chairman. It is ex

knowing that the moment the bill was pected that the proceedings will be private, but probably an official rec ord will be made of them.

C

am willing to admit that there may be a few senators and representatives who have shouted and waved their arms about the demon rum who are so unintelligent that they can't appreciate what monkeys the food sharks are making of them.

But the great majority of those in both houses who have delayed and are delaying the passage of the food hill by prolonging the debate about liquor are deliberately and wilfully betraying the people of the United States in the interest of the rapacious food specualtors and hoarders!

16

Every day's delay has added millions to the profits of the great concerns which handle the food from the time it leaves the producer until it reaches the retailer and the consumer And, what is more, every day's delay has fastened the grip of these great concerns on the nation's food reserves and made it increasingly difficult, if not impossible, to release it without resorting to the most desperate meas uren.

### Hoover's Warning.

About the middle of June, Hoover after a most careful survey of the whole food situation, told the leaders in congress and issued a statement to the public that July 1 was the outside limit when he must have authority to take necessary steps to control the prices of this year's harvest if the con-
