STRIVE TO CREATE WATER DISTRICT TO INCREASE YIELDS

The committee working for irrigation has issued the following circular letter to farmers and fruit growers:

With a scarcity of foodstuffs all the world over; with depleted granaries and large demands, there never has been a time in the history of the country when maximum production was so necessary nor so profitable. If we all get together we can "do it now."

Are you sufficiently interested in having an irrigation investigation to get out and work for it?

Does the fact that your trees do not produce the maximum crops year after year; that your fields are dry and brown now when they should be green and productive; does this fact continue to urge you to sit around in the shade and "Let George do it?"

You will be surprised at the number of men who have come to us since this campaign started with the remark: "Go ahead, I'm behind you." Do you thing this committee appreciates that talk? Believe me it does not!

We want you to realize that the man who will take off his coat and give about fifteen minutes a day for the next six or seven weeks talking investigation will help to carry this election.

We know that you are busy and have need for every cent that you can get your hands on, but you must loosen up with both time and money. Don't make the committee go after you. Seek them out and hand out a five or even a dollar and get out and work. This is no charity, it's a straight business proposition and you can figure in dollars and cents what it's worth to you.

Last December a majority of the voters cast ballots in favor of an investigation. The required sixty per cent was lacking by only a few votes. This fact was responsible for the present campaign. A committee was formed which talked matters over in an informal way and after carefuly going over the entire situation decided upon once again bringing this matter up for consideration. A great deal of work has been done since December. Early in February a sub-committee consisting of Leonard Carpenter, T. W. Osgood and J. C. Barnes held conferences with Messrs. G. L. Schermerhorn, L. Neidermeyer and H. C. Maury in the hope that some basis could be reached upon which a new campaign could be launched.

After half a dozen meetings it was found that the committees were both favorable to water and that the only thing which separated them was the means of getting it. Messrs. Scherherhorn and Neidermeyer offered to circulate a petition among the farmers and growners for signatures for water. Matters were left in this state but no further action has been reported. Your committee was the more willing to allow time for this work because, at the last election, both thru their attorneys and by their own words, the opponents to a scientific investigation had promised that they would initiate a plan whereby those who need water could obtain it. The state legislature of 1917 made a few changes in the Wright act but found that it was essentially fair and just to all.

In June a committee meeting was held and it decided to go ahead with the present campaign. Messrs. Carpenter, H. C. Egan and A. W. Stone colunteered to canvas for funds and they succeeded in raising enough money to have lists of property owners prepared, map drawn and the first printing and postage bills paid. This money was all donated in sums ranging from ten dollars down and was the willing help of land owners vitally interested in a scientific investigation of the water possibilities of ths valley. The county court has apponted August 13 for the public hearing. The personnel of this committee is a warrant of the honesty and fair-mindedness of this campaign. Many hundreds of thousands of dollars of property, many farms and orchards large and small, are represented by the men of this committee, by the men and women who signed the petition to the county court and by those who returned signed postal cards. These owners are jealous of their property and would not take a chance on a fly-by-night scheme.

Now, let us see why the sub-committee consisting of Messrs. Carpenter, Osgood and Barnes could not agree with Messrs. Schermerhorn, Neidermeyer and Maury. Your committee held that a district organization was preferable to private ownership because:

1. The cost of the whole system would fall equally upon every acre which received benefit.

2. The irrigation system when built would be owned and operated by the growers and not by a private company which would rightly expect a money profit from it.

3. A thoro and scientific investigation was certain because it would be made under the supervision of the growers themselves.

4. The act under which the district is formed is in force in all irrigated states and has proved to be fair and efficient. (a) It provides for two elections; the first to form the district and the second to vote upon a definite plan for obtaining water at which cost per acre, plans for paying for the completed system, and all other points are set forth item by item. (b) It insures that the buyers are getting just what they pay for and at the lowest cost. (c) It places the management in the hands of the users who are the owners and are the ones most interested in an economical and efficient management. (d) It makes provision for the exemption of all land not benefited. (e) It equalizes the cost by making each acre pay its proportionate share and this tends to reduce the unit cost to every farmer. (f) It insures that they pay for the benefit which they receive. It is a fact that when we get water the sub-irrigation in certain sections will be increased, and that wells will show the rising water table, but it must be remembered that those who have paid for the system are also paying for the water thus free of cost.

5. It is necessary to have all the land which will be benefited in at the start so that the cost will be within reason. The only valid objections raised were that this plan would force the large land owners to place all their land under water at once and that federal farm loans could not be secured. The first is true but we believe that the whole good of the valley is more important than the objections of a few large land owners and moreover that they themselves would realize the benefits of water because only land which would be benefited would be forced to pay for the water. The federal farm loan board assures us that the district bonds would not be prejudicial to these loans.

At the last election the story was widely circulated that a vote for the investigation was equal to placing a mortgage of from one hundred dollars an acre up on all the property in the district. This is absolutely false. The law specifies that the cost of an investigation must be limited to not more than one dollar per acre and any cost in excess must be met by the directors personally. Do not let yourself make a snap judgment. Remember that this law has stood the test of time and is constantly being used. When here is something you do not understand, make it your business to out about it. Stop guessing. Let's find out about it. Stop guessing. Let's able water. Facts about the operation of this law. Pitch hay or get off the mow.

EAGLETS ABROAD

By A. C. Howlett

The last time that I wrote for the Mail Tribune I had given an account of my trip from Portland to Lemont and a partial sketch of the scenery along the route, altho one riding on the cars, with the small low windows, for the windows on the S. P. & S. cars are much smalled than on the S. P. and so low down that it is difficult for one to see anything to advantage from a car window, compared to traveling in an auto or a carriage, but I saw enough to convince me that there is much better country in southern Oregon than there is along the route I had traveled over.

The town of Lomant is one of the many towns that was built up along the S. P. & S. R. R. and is situated in a rich farming country and as it fell to my lot to spend a week in and around the town and my stay was with one of the merchants, a nephew of Mrs. Howlett's by marriage, I had the privilege of meeting quite a number of the leading farmers in that section and asked quite a number of questions about the country, and in addition to that rode out on to the farming community. But before I begin to tell about the farming community, I wish to say something of what I saw and heard in the town. Lamont is strictly an inland town situated about fifty miles from Snake river and is surrounded by a sparsely settled community of farmers who do the most of their trading in Lamont, altho there are other small towns close by along the R. R. lines. In the town they have a new looking school house and three churches and before the state went dry they supported three saloons. There are about three hundred inhabitants. The town incorporated and of course is heavily in debt. They have a water system. A large well at the foot of a hill in the edge of town, from which they pump water into a reservoir on the hill, thus giving fire protection as well as a good supply of water for domestic and irrigation purposes, an a small scale. I suggested to some of the leading citizens that they could put in an electric plant right at the foot of the hill, taking water from the reservoir for the power to run the dynamo, and thus have lights and power, but they invariably protested that it was out of the question, as the town was already in debt so deep, that their taxes were almost unbearable. I noticed that the merchants do business very much as we did in Jackson Co. Ore., in an early day, the farmers come in, hand the list of goods desired to the merchant and go about other business and the bill is charged. In many instances the account runs from one harvest to the next, but they the merchants say that they lose but very little on account of bad debts, but they always put on an extra profit to cover all such losses. To give an idea of how they do business up in this part of Washington, I will specify two instances. Last fall, when flour and salt was as low as they were likely to get, Mr. H. laid in five thousand dollars worth of flour and three carloads of salt and sold them with the raise, thus cleaning up a nice little fortune on just those two articles, and he will sell anything a farmer wants from a hand rake to a combined harvester.

After spending a few days in town, I was met by my granddaughter and her husband and taken to their home out in the wheat belt, and to the casual observer, the rolling hills look more like waste desert land, a volcanic ash that is so light that it will fly worse than ashes, but when one gets close enough to examine the products of the stuff, for it don't look like soil, he begins to wonder where any dampness comes from to produce such grain.

But the mystery was solved when I saw how they farm in that country. As soon as they get their spring crop in the ground they commence to plow for the next season's crop, using generally about one-half of the ground for crops each year. After plowing the land thoroly, they then harrow it down smooth and let it lay until vegetation begins to grow, then they harrow it over again until it is all powdered and if vegetation starts again they go over it again with the harrow, and as soon as they can, after the rain generally in July or August, they sow the wheat in the dust and the ground has been so thoroly worked that it is a complete mulch and the wheat starts to grow, and as soon as the grain is a few inches high they begin to pasture it off and keep it down until the rain, generally sno, comes. But I imagine I hear some of our E. P. farmers complain that they can't farm in that way in our country, but there it is different on the farm joining the one where I was stopping. They had two ten-mule teams and were running four harrows, two thirty-foot and two twenty-foot broad, and there was such a fall of dust followed them that the drivers could hardly see their teams. The land is very hilly and in some places it looked as tho it would be impossible to run a binder or header over them, but they do and the result is that generally they harvest from forty to fifty bushels of wheat and sixty to ninety bushels of oats or barley. You don't find any "For Sale" signs on those farms. This part of the country is much better watered than the country around Pilot Rock of which I wrote some four years ago.

There is one serious drawback to that country and that is there are vast tracts of the country that are covered with rock that is good for nothing, but pasture, but it is good for that and the places are iterspersed with springs and lakes and generally quite level and even these places have oases of very rich land. I noticed one place in particular in one of the rocky tracts of about forty or fifty acres where the men were cutting grain hay and it seemed to be very rank and thick. While I was out to my grandson's place, he took me out riding in his Ford thru the grain belt so that I had a fine view of that part of the country, and while I do not fancy it for a home, it is too mountainous, as there is scarcely a tree to be seen except occasionally an orchard, but the thousands of acres of wheat, oats and barley surely looked good to me.

But I see that I am getting this letter too long, so will close for this time, and the next time will tell about the country between Lamont and where I am now, nine miles from Colville.

GOLD HILL NUGGETS

Mrs. McAdams and Miss Gladys Haymond of Rock Point were shopping in Gold Hill Saturday.

T. J. West and J. Blackington came down from Stineman Saturday with the home molks.

Robert Verbick, accompanied by Miss Hattie Hodges and Maud Sutton, motored to Prospect Sunday.

Mrs. Story Martindale of Camas Valley returned to her home Thursday morning having visited at Sams Valley since coming from Fort Klamath where her husband has been employed.

J. Chisholm of Medford came Saturday evening to visit friends in Gold Hill.

Miss Mary Trunx came home Saturday evening from her work at Jacksonville court house where she is assisting with office work.

Mrs. John McReynolds spent Monday with her sister, Mrs. Barkdale, in Medford.

As canned fruit was asked from Medford residents for the Company Seven, Gold Hill has caught the spirit and is arranging to dry fruit and food stuff so as to be able to send forward when the boys are moved to positions not so easily reached as now.

Mrs. Frank Jordan, who has been visiting at the home of her mother, Mrs. Blackert on Galls Creek, left Saturday morning for her home in Sacramento.

Bob Cook and family have returned this week to their home in Gold Hill after a couple of months spent at Tikilana.

Mr. and Mrs. W. T. Newton returned to their home in Oakland, Cal. Saturday after spending two weeks at the home of his mother, Mrs. E. M. Newton, in this city.

Mrs. George Lane returned to her home in Shoshone, Idaho, Saturday morning after spending July with her parents, Mr. and Mrs. J. H. Beeman. She expects to spend a couple of days in Portland to be able to again visit with her brother, Horton, who is with Company Seven, at Fort Stevens.

Ed Boling of Foots Creek, accompanied by Mrs. Tenie Cook, Miss Hester McReynolds and Alton Morris, of Gold Hill, motored to Ashland Monday, enjoying the beautiful scenery en route and also the scenic drive in that city.

Fred and Ed Bolt were in from the mine near Rogue River Friday evening and Saturday.

Benton Bowers of Ashland was visiting his son Martin Bowers and transacting business in Gold Hill Saturday.

Ogden Snyder was a business visitor to Grants Pass Friday.

Ed Bowling, accompanied by his mother, Mrs. Bessie Anderson and Mrs. Farmer left Tuesday for points in California, where they will visit relatives for some time.

G. W. Little who has been visiting at the home of his daughter, Mrs. Wm. Kinney, left Saturday morning to visit friends near Central Point.

Miss Agnes Flippen returned Saturday morning to Sams valley, where she is assisting with the work at the Duel-Strang dairy ranch.

Mrs. G. Stone, who has been spending the past week with her niece, Mrs. Gregory and friends at North Bend, returned to her home in this city Thursday night.

Roy Bowman who has been working in the timber out of Grants Pass returned to his home in this city Friday morning.

Gerald Owens, Cecil Johnson, A. T. Cooksey and Walter Kelsey snent Sunday with their home folks at Gold Hill. They are employed at the Westerlund orchard east of Medford.

Kenneth Davidson and Elmer Cooksey spent Sunday in Gold Hill with their parents, having come over from the Hill Crest orchard where they are working.

Mrs. McVeigh of the Applegate district is visiting at the home of her mother, Mrs. Bolt.

J. B. Palmer, the artist of Medford, was visiting relatives in Gold Hill Friday.

Several dinner parties were given the past week for Prof. and Mrs. B. A. Adams, who are spending a few weeks in Gold Hill, their former home.

NOTICE OF ELECTION.

Notice is hereby given that an election has been called by the Board of Directors of the Talent Irrigation District of Jackson County, Oregon, and the same will be held on Tuesday, the 21st day of August, 1917, between the hours of eight o'clock A. M. and five o'clock P. M. for the purpose of voting upon and determining whether or not the Talent Irrigation District shall issue bonds in the sum of six hundred thousand ($600,000) dollars, for the purpose, necessary or convenient, of carrying out the provisions of a certain act passed by the general assembly of the state of Oregon, of 1917, and known as House Bill number (158), being chapter (357) of the General Laws of Oregon, 1917.

The polling place for said election shall be in the Garage, on the ranch owned by the Talent Orchard Co., and located on the N. E. ¼ of S. E. ¼ of section (22) Twp. (38) 1 West of the Willamette Meridian, and being within the boundaries of the Talent Irrigation District, Jackson County, Oregon.

The electors of said Talent Irrigation District are hereby required to cast ballots at said election which shall contain the words, "Bonds—Yes" and "Bonds—No."

Those in favor of the said District issuing bonds in the sum of $600,000.00 shall cast their ballots "Bonds—Yes," and those opposed to the issuance of bonds in the sum of $600,000.00 shall cast their ballots "Bonds—No."

Dated at Talent, Oregon, July 14, 1917.

R. E. ROBINSON
Chairman.
W. J. HARTZELL,
O. A. MANNING,
Board of Directors of the Talent Irrigation District, Jackson County, Oregon.
Attest:
LOUIS BROWN,
Secretary.

Fiery Eczema and Skin Eruptions Readily Yield to This Old Remedy

Sucessfully used for fifty years.

Eczema and similar skin troubles come from a disordered, impure condition of the blood, and they can only be cured by giving the blood a thorough cleansing, and removing from it all traces of impurity.

This is why S. S. S. has been used so successfully in hundreds of cases of Eczema and other skin eruptions.

This wonderful remedy is without an equal as a blood purifier, being probably the oldest blood medicine on the market. It has been sold by druggists for fifty years.

You are invited to write to-day for complete and full advice as to the treatment of your own case. Address, Chief Medical Adviser, Swift Specific Co., Dept. H Atlanta, Ga.
