

LOCAL AND PERSONAL

According to report from Red Cross headquarters, the salvage department of that organization is lacking sufficient material to conduct its work. It is requested that people having partly worn clothes, who would like to see them put to a good use, can have their wish gratified by giving them to the Red Cross. The clothes may be brought to the parlors in the Sparta Building, or persons having them may leave their phone number and they will be called for. Some of the articles required are flour sacks, linen, sheets and pillow clips, and any wool or cotton apparel that can be worked over.

New Minister Coming.

The new minister will arrive Friday night and will be received at St. Mark's hall in a fitting manner. "The New Minister" is a comic performance with not a dull moment in it. The characters are taken by local talent, and rehearsals have been held regularly for some time. It will appeal to both old and young, and anyone leaving at the close with a "face as long as grandfather's clock" may ask for a return of the price of admission.

This will be given under the auspices of the Ladies' Aid of the First Methodist church. See cast of characters and synopsis in the advertising columns of this issue.

They're Deadly Foes to Gas Waste—the Chalmers Hot Spot and Ram's-Horn Manifold

These are days when the sagacious person is cutting out all forms of waste in his shop and in his home.

No doubt a condition that has sent thousands to see the new Chalmers with its two great devices that Hooverize gas.

One of them is the now noted Hot Spot, which cracks up and heats up the raw gas into a cooked condition for wonderful power results.

The other is the Ram's-Horn Manifold, which of the two is probably an even greater device.

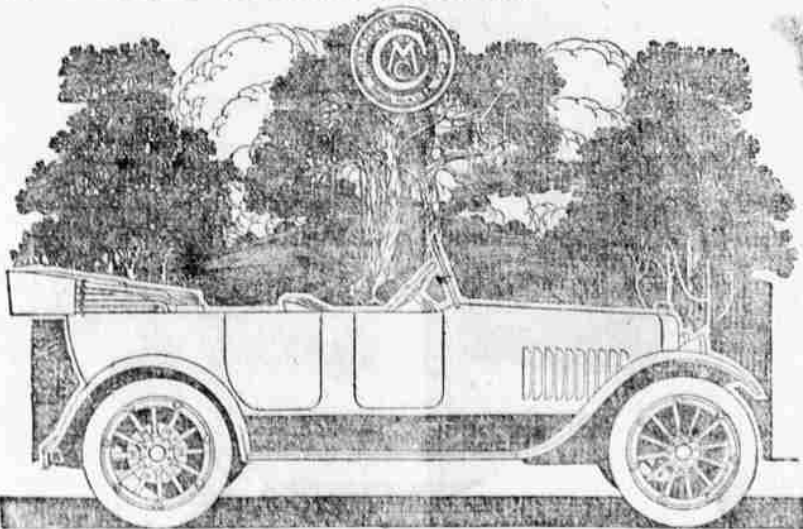

For it takes the gas vapor from the Hot Spot and carries it 14 inches equi-distant to each cylinder without sharp turns, angles or pockets where the vapor might lodge.

So that at the moment of sparking, the gas is (like the charge in a large projectile) ready for 100% results.

There's so little that comes out of the exhaust in the form of unburned gas as to be negligible.

All the power goes into the crank-shaft and out of the rear wheels.

And such a soft, luring power that it casts a spell of intense satisfaction the moment your foot touches the accelerator.
