## BIG FEATURE AT PAGE ON SUNDAY

"My Own United States,"—the words send a thrill of pride through the veins of every genuine, red-blooded American. Those who have done the most for their country have always loved it most. The makers of its early history loved it with a passionate devotion. Such men as Jefferson, Hamilton, Lincoln and Grant consecrated their lives to the welfare of the young republic.

The noble deeds of these men live again in "My Own United States," which brings a message from the past for the guidance of the future. There is no one who will not be a better American for having seen it. It turns the pages of history in a fascinating way, never to be forgotten.

Mr. Arnold Daly the distinguished American actor, plays the leading role.

Our president is shown delivering an address to a multitude of people in the opening scenes of the picture and the other heroes are shown in scenes vital in American history. Among those who are represented with utmost fidelity in characterization are President Abraham Lincoln, President Thomas Jefferson, General U. S. Grant, Admiral Stephen Decatur, Andrew Jackson, General Anron Burr, and Colonel Alexander Hamilton. "My Own United States" reminds us of our heroes.

## HOME NEWS FOR BOYS IN TRENCHES SUPPLIED DAILY

NEW YORK, July 13.—Arrangements to distribute neighborhood news to all of the American fighting forces abroad have been perfected by the foreign press cable service bureau of the committee on public information which is directed by Walter Seegers. This new feature will be edited by Herman Suter.

The service will be sent to France daily by wireless. The reports will be delivered free of tolls to military publications in France and where no newspapers can be distributed bulletins will be supplied for posting on bulletin boards. The reports will be copied also by the wireless plants of American warships wherever stationed. News agencies have agreed to co-operate.

The part played by The Associated Press for instance, will be largely in the hands of the bureaus scattered strategically throughout the United States. Someone in each bureau will send a brief telegraphic dispatch to the committee in New York giving merely the high spots of the news local to the territory covered by such bureaus.

## LOST 50 FRIENDS ON EXCURSION STEAMER

Mr. and Mrs. Will A. Gates, former residents for many years at Peoria and Pekin, Ill., which cities adjoin each other, were deeply affected last night on receipt of a copy of a home paper, to read in the death list of over 100 who lost their lives in the wreck of the excursion steamer, Columbia, in the Illinois river, a week ago Friday. The names of over 50 of their intimate friends, who were residents of Pekin. Besides they had a personal acquaintance with nearly all the others who perished.

A rather remarkable coincidence between this disaster and the one of 26 years ago in which 30 Pekin people lost their lives when the excursion steamer Frankie Folsom, sunk in Peoria Lake, is related by Mr. Gates. Mrs. William Lapat of Pekin was on the Frankie Folsom and was rescued. She then vowed to her husband that she would never again step on a boat, and she kept this vow until a week ago Friday. Just 26 years ago to a day after the Frankie Folsom went down.

Her husband was the president of the society which was giving the Columbia excursion, and she readily gave in to his pleadings to go along and went aboard the boat. Both herself and husband were among the victims.

## PELICAN CAUSES FIRE IN KLAMATH PLANT

KLAMATH FALLS, Ore., July 13.—Fire, believed to have been caused by a pelican flying against the wires and crossing a high tension power circuit at the Link river plant of the California-Oregon Power company Thursday night burned a \$1,500 transformer, several fences and a large plot of dried grass surrounding.

It was a spectacular conflagration, as the crossed wires, carrying a charge of 34,000 volts, sent great sheets of flame in all directions.

**For Constipation and Biliousness**  
Good digestion goes far toward comfort and health in hot weather. Undigested food in the stomach can quickly poison the system. Geo. Jenner, 416 Labor St., San Antonio, Tex., writes: "Foley Cathartic Tablets have proven the best laxative I have taken and I recommend them to any one suffering from constipation or biliousness. They should be in every traveling man's grip." Quick relief for sick headache, bloating or other condition caused by bad digestion. Sold everywhere.

## If Other Makers Use The "Hot Spot" Why Don't They Know What It Does?

It has been amusing to us to see the avidity with which rival makers and especially salesmen, have echoed the Chalmers statements about the "Hot Spot" and its virtues.

If you believe all you hear, they all have the "Hot Spot" now. But when you analyze the various assertions, you find that while they use the term, it is doubtful if they really know what it means.

For example, one maker advertises that the "Hot Spot" makes his motor start easier when cold. Now that is ridiculous. The "Hot Spot" does not come into action until it is made hot by the exhaust from the running motor.

So you see it has no bearing whatsoever on the starting of the motor, easy or otherwise.

It is that other Chalmers feature, the "Rams Horn" manifold, that makes the Chalmers start easy at all times, in all climates and with all brands of gasoline,—good, bad and indifferent.

We have featured the combination of "Hot Spot" and "Rams Horn" Manifold as giving to this car qualities possessed in the same degree by no other name;—gasoline economy, smooth running, more power and easy starting.

It's a pity there is no way of patenting adjectives or copyrighting coined phrases—it would protect copyists from falling into ridiculous errors!

The terms "Hot Spot" and "Rams Horn" are coined phrases originated in Chalmers publicity and, according to all the ethics of advertising, they belong exclusively to the Chalmers.

So far as we are concerned, we don't care how many copy the terms—imitation is the sincerest form of flattery.

Nor do we object to other engineers applying the principles indicated by those terms—if they know how.

One of the rewards of leadership is to be copied—imitated.

But it would seem as if the engineer who tries to achieve results by adopting these Chalmers discoveries, might instruct the sales organization as to what each feature does—for surely someone is in error as to that if we are to judge by the advertisements.

By the way; you have read and heard much about these two Chalmers discoveries—do you really know what a tremendous improvement they, together, make in a motor car?

If you don't, just ask a Chalmers salesman—he will be delighted to tell you, and then you'll understand why everybody in the trade says, "This is a Chalmers year."
