FOUR MINUTE MEN TO CONTROL WAR ORATORY

In the interests of economy and efficiency, the division of four minute men of the committee on public information has taken over the work of the speaking division of the same committee.

Hitherto, the four minute men have taken charge of all speaking of "ready-made" audiences, in theaters, lodges, churches, etc., in all parts of the country; while the speaking division has provided special orators for war rallies and patriotic meetings called together mainly to hear these orators.

In the course of their work the four minute men have built up a very complete organization, reaching into almost every community in the United States, Alaska, Porto Rico, Cuba and the Philippine Islands.

This organization is now available for the routing and reception of distinguished orators, insuring also that the greatest possible number of people in each community may profit from their visits by hearing the messages they bring.

The consolidation effects a material saving in time, energy and money, since the four minute men machinery is in constant operation and does not require re-organization to receive each distinguished speaker.

It is anticipated that many more communities will be privileged to see and hear such groups of veterans as the Blue Devils of France, recently routed through the speaking division, and also that many more similar groups or individual veterans may be sent out as a result of the consolidation.

Don't Trust a Quack Doctor

You wouldn't put your health in the hands of a natural born untrained doctor.

You wouldn't want your teeth filled by a correspondence school dentist!

And you don't want your battery cared for by an untrained man—even if he says he knows all about batteries.

Doctoring batteries is a profession with us—we are trained battery experts, and we recognize and treat all of the common battery ills.

Your battery ought to be tested—and you ought also to learn about Threaded Rubber Insulation—the most important battery improvement in years.

Attention: Mr. Dairyman and Farmer

The Independent Creamery, after closest investigation, has concluded that the Rogue River Valley is especially adapted to successful dairying. It is peculiarly fitted by soil, climatic and marketing facilities, and to support this conclusion we have decided to install at Medford a Complete modern Creamery for the Manufacture of Butter, Ice Cream and Cheese and will also purchase Eggs Poultry, etc.

It is our intention to operate extensively, and we ask the consideration of every farmer in the Valley. We want his support, and he needs us. "It is our business to help his business," and in that way help ourselves. The Independent Creamery has ample capital to meet all obligations and every contingency.

Their business methods are well and favorably known, as being correct. Established in the year 1900 it has developed from very small beginnings to the largest manufacturers of butter in Oregon. During its eighteen years' career it has never been necessary to change managers. Many other creameries have come and gone in that time, thus demonstrating that Independence has won and held the confidence of the producer, and has as its reward for conservative management and square dealing prospered phenomenally. In the year 1900 Polk County (where Independence is located) had but one man with ten cows. Today there is but one county in the United States (St. Lawrence County, N. Y.) that has more "register of merit" Jerseys than Polk County. Independence Creamery has been largely instrumental in bringing about this result.

The states where dairying is followed extensively are the richest states (agriculturally) in America. Alfalfa is the ideal feed for successful dairying. We have it in Rogue River Valley and this section is therefore boundless in its possibilities.

It is the intention of this company to exert every effort, consistent with reason, to promote this industry. We will take all raw material offered. If there is a demand for cows we will ship them in. Will sell silos, milking machines, separators, etc. It is our hope to be a benefit to the producer and an asset to the entire community.

Temporarily we will operate trucks to gather the cream, and expect to be manufacturing here by October 15th.

For information at this time see our local representative, Mr. N. A. Loneks, at Hotel Holland, Johnson Produce Co., Central Point, or address
