MEDFORD SHY \$95,000 OF QUOTA OF LIBERTY BONDS

In gloomy contrast with the good record of the several previous days, only \$5000 was subscribed Thursday in the Medford district liberty bond campaign. This leaves about \$95,000 yet to go before the top is reached.

The liberty bond committee makes an urgent appeal for volunteer solicitors, as from now on it will take good hard persuasive work to round up the slow subscribing citizens and the slackers. Volunteer workers and subscriptions are needed worse now than at any previous stage of the campaign. The lack of sufficient aides and solicitors is very discouraging to the committee.

It has got so that the committee secretary spends all of one day in calling up known patriotic citizens and getting their promise to work as collectors the next day, and the next day but few show up and the secretary has to spend most of that day at the phone in trying to get substitutes to serve. Of those who promised to serve today but one man showed up this morning, and there were but few to show up for afternoon work.

Many new subscriptions are coming in, that is subscriptions from people who had not subscribed in the last campaign, but many people who bought bonds in the last campaign have so far failed to subscribe in the present campaign.

The committee appeals to them to make their subscriptions now instead of waiting any longer. It can be done now as well as later. A subscriber only has to pay ten per cent down and has four months in comparatively easy payments to pay the rest.

Wednesday's subscriptions were:

CUT THIS OUT Old English Recipe for Catarrh, Catarrh Deafness and Head Noises

If you know of some one who is troubled with Catarrh Deafness, head noises or ordinary catarrh cut out this formula and hand it to them and you may have been the means of saving some poor sufferer perhaps from total deafness. In England scientists for a long time past have recognized that catarrh is a constitutional disease and necessarily requires constitutional treatment.

Sprays, inhalers and nose douches are liable to irritate the delicate air passages and force the disease into the middle ear which frequently means total deafness, or else the disease may be driven down the air passages towards the lungs which is equally as dangerous. The following formula which is used extensively in the damp English climate is a constitutional treatment and should prove especially efficacious to sufferers here who live under more favorable climate conditions.

Secure from your druggist 1 ounce of Parmit (Double strength). Take this home and add to it 1/4 pint of hot water and a little granulated sugar; stir until dissolved. Take one tablespoonful four times a day. This will often bring quick relief from distressing head noises. Clogged nostrils should open, breathing become easy and hearing improve as the inflammation in the eustachian tubes is reduced. Parmit used in this way acts directly upon the blood and mucous surfaces of the system and has a tonic action that helps to obtain the desired results. The preparation is easy to make, costs little and is pleasant to take. Every person who has catarrh or head noises or is hard of hearing should give this treatment a trial.
