CANADA PLANS DEMOBILIZATION OF OVERSEAS ARMY

WINNEPEG, Canada, Dec. 5.—Plans for the demobilization of Canada's 286,304 overseas troops under a system intended to meet economic and industrial conditions have been completed and will be put into operation when withdrawal of the forces is consented to by the high command.

After considering available shipping facilities and rolling stock in Canada, the imperial ministry of shipping and the Canadian war board have concluded that the rate of return can approximate 20,000 men a month.

Classification of the troops into occupational groups by the militia department was deemed advisable to meet the requirements of the labor market in the various districts. To return the men regardless of their occupation in civil life and demands of the labor market in their respective districts would work a hardship upon them as well as upon industry, officials decided.

DRINK HOT WATER BEFORE BREAKFAST

Says you really feel clean, sweet and fresh inside, and are seldom ill.

If you are accustomed to wake up with a coated tongue, foul breath or a dull, dizzy headache; or, if your meals sour and turn into gas and acids, you have a real surprise awaiting you.

To-morrow morning, immediately upon arising, drink a glass of hot water with a teaspoonful of limestone phosphate in it. This is intended to first neutralize and then wash out of your stomach, liver, kidneys and thirty feet of intestines all the indigestible waste, poisons, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal.

Those subject to sick headaches, backache, bilious attacks, constipation or any form of stomach trouble, are urged to get a quarter pound of limestone phosphate from the drug store and begin enjoying this morning inside-bath. It is said that men and women who try this become enthusiastic and keep it up daily. It is a splendid health measure for it is more important to keep clean and pure on the inside than on the outside, because the skin pores do not absorb impurities into the blood, causing disease, while the bowel pores do.
