Why Two or More Federals on So Many Cars Look the cars over that are equipped with Federal Tires—nearly always two or more. Note the way the tires are worn and you will see that Federal users are rebuying after giving Federals a trial. Proof of quality? Sure! Also proof that customers like the way we do business on Federals. They like the way we back them up. They know that every Federal must give service. That if defects appear we stand back of them. They are sure of their money's worth—and they cost no more than ordinary tires. C. E. Gates Auto Co.
