BALLOONS USED AS CLOUD BUOYS FOR MAIL AIRSHIPS

LONDON—(Correspondence of the Associated Press.) Balloons are used as buoys above the clouds to mark the course of the long distance airplane mail service from Marquise, near Boulogne, France, to Cologne, Germany, says an announcement of the Royal Air force which is operating this service. Each balloon is marked with signs to indicate to the airplane pilot its exact locality and thus enable the pilots to shape their course anew when the weather is bad and the clouds are very low. The balloons also mark the landing grounds for the airplanes. Observers in the balloons are required to report the condition of weather above the cloud layer, the speed and direction of wind and to pass this information to the nearest wireless station for transmission to the airplane pilots.

A chain of wireless stations has been organized along the routes for the transmission of weather reports and if the pilot of an airplane is compelled to make a forced landing he is expected to report this location by wireless or telephone, to the nearest wireless station so that a motor truck can be despatched to recover the mails and render assistance to the airplane.

As it is the intention of the Royal Air force to maintain a night mail service on this route, a chain of light houses also has been established and later, it is announced the balloons will be fitted for carrying signal lights and remaining aloft at night to a further guide to the pilots.

Should a pilot lose his way in the clouds, arrangements have been made whereby he will be able to get in communication with a wireless station from which he can receive directions how to proceed to the nearest landing ground. This wireless guidance is expected to be useful in bad weather or in night flying.

Emergency landing grounds have been located along the route in addition to the regular terminals and the airplanes carry pigeons to be used as messengers in case of accident.

CANDY CRAVED BY YANKS IN PARIS

PARIS, March 27.—One of the features of the peace conference is the queue which forms daily in the corridor of the hotel which shelters the American delegates to buy candy from the canteen established by the American government to supply cigars, cigarettes, candy and chewing gum to the hundreds of specialists and other government employes quartered there.

Candy is so scarce and so expensive in Paris that it is the favorite article on sale in all American army, Red Cross and Young Men's Christian association canteens. The allowance given to each canteen daily is small. Consequently the men with a sweet tooth watch eagerly for the arrival of the daily supply and struggle for advanced positions in the one which always contains more buyers than there are packages of candy. No man is allowed to have more than one pound of candy and the maximum price is three francs a pound. Among officers, stenographers, correspondents, historians and be-spectacled specialists on Mesopotamia and Trans-Caucasia good naturedly command for one of the overseas tins of chocolates.

ESCH AWARDED MEDALS AWARDED TO AMERICAN OFFICIALS

WASHINGTON, March 27.—General Pershing has awarded the distinguished service medal to six officials of the American government for exceptionally meditorious and distinguished services. They are Edward N. Hurley, chairman of the shipping board; Paul D. Cravath, representative of the treasury department; George McFadden, representative in France of the war trade board; Dwight W. Morrow, member of the American shipping commission; L. H. Herman, member of the American inter-allied maritime council, and Edward R. Stettinius, special assistant secretary of war.

SILHOUETTE

Here is demostrated the newest new silhouette, entitled unromantically, the barrel effect. The width is all in the middle, at the hip lines—and in this case it is achieved by a fourteen-inch band of dark blue satin heavily embroidered in gold, silver and rainbow-hued silks—so that the wearer resembles a triumph of oriental tapestry. Embroidered suspenders hang the band from the shoulders. The foundation gown is of navy blue tricotine, narrow shouldered, tight sleeved, and but three-fourths of a yard around the hem!

It's a marvel of a gown in which to take a firm stand!

ALASKA ON EVE OF GREAT GOLD MINING REVIVAL

SEWARD, Alaska, Feb. 20.—(By Mail.)—In Alaska to make a survey of various resources for Secretary of the Interior Lane, W. A. Ryan is quoted in the Seward Gateway as saying that Alaska is on the eve of a revival in mining that soon will result in productions surpassing its best previous records.

Numerous discoveries of more or less apparent value have been made in well known Alaskan mining regions this winter, according to Ryan. In the Fairbanks district a discovery has been reported in the Saloba country. New discoveries, he says, have been reported from Eve and Moose creeks, tributary to the Nenana river, and from the vicinity of Lignite or Hasanna creek. A considerable movement of prospectors into the hills in the Bonnifield district indicates the gradual spread of knowledge concerning mineral discoveries adjacent to the government railroad.

In the past, Mr. Ryan pointed out, most of the north's rich gold finds have been made near waterways, men not venturing far from avenues of communication. This, of course, was never advanced as an argument that paying minerals were not to be found elsewhere, so that the opening of the government railroad is considered as likely to bring out new bonanzas. The Broad Pass country is cited as one isolated region which, known to be rich in various minerals, will be easily accessible to the prospecting and development after the railroad has pierced it. Other newer and rich fields, similarly isolated before, will likewise be opened. Alaska, in fact, Mr. Ryan asserts, stands in the position of being able to unlock a great treasure chest to the eyes of the world. In the far northern districts around the Yukon hundreds of thousands of square miles of low grade alluvial deposits will be worked by dredging and hydraulicking, and a dozen or more quartz proposition will become immediately productive, Mr. Ryan declares, because high transportation costs will have been removed.

SOCIALISTS WANT ALL STATUES MELTED

BERLIN, Mar. 27.—(By Associated Press.) Independent socialists in Bavaria have demanded that the government melt all statues of former royalties and statesmen, including that of Bismarck. Materials of the statues, they ask, shall be given to industry.

The national flags, the independents demand, shall be converted into clothing for children.

AMERICANS AMAZE PARIS CHEFS BY BIG BREAKFASTS

PARIS.—(Correspondence of the Associated Press.)—Cooks at the hotel where the hundreds of Americans connected with the peace conference are staying are amazed at the appetites of the Americans. The American breakfast upset all calculations in the French hotel accustomed to supplying guests with rolls and coffee as an early morning meal. Wild calls for ham and eggs, beefsteaks, chops, oatmeal and hot cakes surprised the French cooks, who, after weeks of catering to the hungry Americans have not become reconciled to the American breakfast menu.

The American fondness for hors d'oeuvers also caused consternation. Great dishes of bet pickle, potato salad, sardines, cold slaw and other relishes served as a preliminary to the conventional French dinner, disappear so rapidly that it has become necessary to employ many additional cooks to prepare delicacies of this sort. Americans help themselves so freely to this initial course that they frequently have little appetite for the soup, fish and other dishes which follow.

As the hotel kitchen can draw on army supplies for its food, the Americans have many delicacies not available generally in Paris cafes. Ices, ice cream and pastry made with real sugar are offered to the peace delegation. In most Paris hotels and cafes saccharine is used for such purposes, and even for sweetening coffee. The hotel where the Americans stay also has an abundance of white flour and genuine white bread. Elsewhere in Paris the bread is dark, and even pastry, and when available is made from brown flour.

TURKISH FORCES TERRORIZE GREEKS

LONDON.—(Correspondence of the Associated Press.)—Information received here from Batum indicates that despite the surrender of the Turkish forces, the position of the Greeks south of the Black Sea and in the Caucasus is tragic.

It is alleged that outrages are being committed by the demobilized but still armed Turkish reservists, and that the Young Turk commander, General Halid Pasha, has been pursuing a policy of systematic extermination of Christians.

This officer, who is a friend of Enver Pasha, is said to be supplying arms to Turkish irregulars in the Russian territories evacuated by the Turkish army. Lately he received from Turkish sources 200 car loads of arms and munitions.

It is charged that these reservists and irregulars loot and massacre the Greek population.

The flourishing Greek town of Sanda, near Trebizond, with a population of about 8,000 is reported besieged by Turkish reservists. The Greeks, profiting by the naturally strong position of the town, are offering heroic resistance.

109,247 AVIATION TROOPS DISCHARGED TO DATE

WASHINGTON, March 27.—Discharges from the army air service to March 13, totalled 109,247 officers, cadets and enlisted men. The total strength of the service at the end of hostilities was 190,527.

Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe these hot water enthusiasts.

There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infest the bowels, the quick result is poisons and toxins which are then absorbed into the blood causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe on the inside than on the outside, because the skin pores do not absorb impurities into the blood while the bowel pores do.
