The ladies entered hear-thly into the spirit of the frolic, in fact the major share of the axtravamanza features were protraved by merry maids and matrons en costume. many of whom were recognized in spite of disguises adopted. Seldom, if ever, has Ashland witnessed a greater spectacular event, all of which was but the precurser of the formal ceremonies of the initiatory work in the evening. THE MAKING OF A FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on with the reliability, accuracy, skill and cleanliness which attends the making of this great medicine for woman's ills.

Over 356,000 pounds of various herbs are used anually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is steri ized and as a final precaution in cleanliners the medicine is pasteurized and scaled in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydis E. Pinkham's Vegetable Compound which we are continually publishing strest to its virtue.
