Should women be put on trial for their faults? And should they be tried by men? Are their so-called weaknesses due to the mediocre demands of men? Do women know how to stick to ideals that are not social assets? What is the type of girl that invariably becomes an old maid? Do men put a premium on virtue? These are a few of the questions that are discussed and answered in a tremendously stimulating article called "Supply and Demand." Every woman in America owes it to herself to read it.

This is but one of the 38 stimulating and amusing features in this big magazine.
