The BLASTER says: "I use IANT. It gets them out cleaner"

Professional blasters know explosives. They have tried all the different makes. Many of them say "Giant gets the stumps out cleaner." John Zurr of Santa Rosa, Cal., writes: "From the beginning of the time I have been using powder for stump blasting and other agricultural work, I have found the powder made by The Giant Powder Co. to be the most satisfactory."

CONDITIONS NEAR EAST FRIGHTFUL SAYS MR. HOOVER

It seems hard for us in America to realize the appalling conditions which prevail in the Near East at this time. Herbert Hoover, says, "In my opinion, in the Near East is the most desperate situation in the world today, and no man knows the present world needs as does Hoover. Major General Harboord, ex-head of Pershing's service of supply, sent by our government to investigate conditions in the Near East, stated in the New York Times on his return recently that at the lowest estimates, there were over 800,000 persons destitute, in this area, of whom at least 500,000 must have complete support to keep them alive until the next harvest. This is the most conservative estimate, the real numbers may far exceed these. This is the testimony of a sane, clear headed soldier, an expert, who has actually been over the ground, and who states further that the story of conditions in this area is a tale of "misery unadorned."

BOLSHEVIKI IN GERMAN REVOLT

(Continued from Page One) workers' grievance against the government was its militarism, and asserted they would try to weaken the government by agitation.

May Strike Again. CHEMNITZ, Saxon, Mar. 26.—(By The Associated Press)—Communists are firmly entrenched in control here and prepared to resist attacks by government troops which may be sent against the city. In the event the troops secure control, a general strike may again be called. Heinrich Brandler, chairman of the executive committee of the workers, declared today his followers were closely co-operating with workers in the Ruhr valley. "We do not expect an attack, as the government's forces are too weak," he said, "but if it comes we will resist."

There are 12,000 men under arms in this district, and Brandler said the workers' leaders could call upon not only the workmen of Chemnitz, who made up 92 per cent of the population, but those of the entire Voet land and ore mountain regions. The mayor of the town confirmed Brandler's declaration that workers were co-operating with the municipal authorities without interfering with the latter. Brandler branded as nonsense reports that a soviet government was to be established.

Co-operation in Handling Fresh Fruits for Eastern Markets. In the packing and marketing of fresh deciduous fruits, Bardwell Fruit Company co-operates with growers. It furnishes packing house facilities assembles the fruit of the many individual growers, grades, packs and loads it in "community" cars. It furnishes the materials and labor and markets the fruit at the lowest specific rates. Under this plan of co-operation the grower is not called upon to invest his money in packing plants, marketing "machinery," etc. Where growers prefer to do their own packing Bardwell Fruit Company accepts the loaded cars for marketing co-operates with such car-lot growers. Materials and supplies are furnished at wholesale competitive prices when wanted. In this manner Bardwell Fruit company acts as marketing agent for many of the largest growers in Rogue River Valley and a number of independent shippers. The live banking institution of today co-operates with its patrons for mutual success and the country merchant does likewise, in carrying merchandise and selling at competitive prices. Fruit growers co-operate and get service and value through their local bankers and merchants without being stockholders in either. Neither is it necessary for the grower, in order to pack and market his fruit successfully to invest in such adjuncts as timber lands, sawmills, ice plants canning factories or supply stores. In packing or marketing through Bardwell Fruit Company, the grower is entirely independent. His fruit is handled on a specific contract from season to season and he cannot be arbitrarily assessed in order to hold him, should he become dissatisfied. The best form of co-operation is that which holds business through good results and mutual satisfaction, free from entangling features and liabilities. The grower can inspect every original record in connection with the sale of his fruits at the main office of the Bardwell Fruit Company. What better evidence of business co-operation and good faith could be offered? Bardwell Fruit Company in itself is a co-operative institution. Bardwell Fruit Company handles all fruits strictly for the grower. No agent or employe of this company is permitted or authorized to buy crops outright. Every member of the organization realizes that that to hold business and increase it he must assume an individual responsibility in giving the grower full co-operation in every detail of packing and marketing. The remarkable growth of the Bardwell Fruit Company is the result of meritorious service to growers.

Our Customers Tell Us. THAT OUR IMPLEMENTS DO THE WORK THE WAY THE FARMER WANTS IT DONE. And that's the best recommendation any farm implement can have. There is no substitute for the quality that assures good work—the kind that meets the practical farmer's approval. Our plows pull light and handle easily, but it's the good seed bed-making quality of their bottoms that gives them leadership. Our corn planters have an automatic marker and all of the other conveniences, but it is the accuracy of their drop—the precision with which they put the desired number of kernels in every hill—that makes users especially glad they bought at our store. Our cultivators have more than the usual operating advantages, but it is the way they work all of the soil between the rows that makes users call them the best. You will find ability to do good work predominant in all our implements. They are built by a firm that puts good work first. We see that they are set up the way the manufacturer intended. We help you to understand their operation so that you can get the full advantage of their good working qualities. Be sure of good work above everything else, when you buy your implements this year.
