Time to Spray For Scab With favorable weather conditions pears in many parts of the valley will be in the proper stage for what is known as the "Pink Scab Spray."

This spraying should be delayed as late as possible and still get the spray on before the blossom opens.

Apple scab spraying will be a little later than the pears, and in sections where scab was last year on either apples or pears, special effort should be made to make this application at the proper time.

For pears use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For apples use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For pears use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For apples use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For pears use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For apples use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For pears use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.

For apples use liquid lime and sulphur, one gallon to thirty-five gallons of water. Dry lime and sulphur three to four pounds to fifty gallons of water.
