

A WONDERFUL HELP

At Two Stages of Life Lydia E. Pinkham's Vegetable Compound Made Mrs. Fairburn Strong And Well.

Chattanooga, Tenn.—I used Lydia E. Pinkham's Vegetable Compound before my baby came when I could no longer keep up. It strengthened my back and relieved me of the distressing effect which so often develops at such times. It helped me wonderfully. That was my first experience with the Vegetable Compound. Years afterwards I took it during the Change of Life and got along so well I scarcely ever had to lie down during the day and seldom had dizzy fainting spells. I am now well and strong, can do all my housework with perfect ease and it is a comfort to me to be able to say to other suffering women, "Take Lydia E. Pinkham's medicine and be strong." I will be glad to have you use my name if it will be the means of helping any one.

—Mrs. R. A. FAIRBURN, 606 Orchard Knob Avenue, Chattanooga, Tenn.

For forty years this famous root and herb medicine has been preeminently successful in controlling the diseases of women. Merit alone could have stood this test of time.

Storage Batteries Do Not Care for Themselves

The storage battery requires so little attention that this is really the chief reason why it is neglected by the motorist, according to the belief of M. B. Walker of Auto Electric Equipment Company, U.S.I. Service Station representative for this district, who expressed himself thus: "Motorists have the idea that because their work in caring for a battery appears quite simple they would be safe if they left the battery alone altogether. They go along on this theory until suddenly the engine refuses to turn over when the starting switch is closed. Then what happens? They dig out their book of instructions or introduce themselves for the first time to a U.S.I. Service Station. "After this unfortunate experience it dawns on the motorist that his battery, like his engine, is a bit human-like after all, and requires a little attention once in a while. He has also learned that a visit now and again to a U.S.I. Service Station will repay him in giving his battery a longer lease on life. "My opinion is that the car-owner should not only give his battery a little attention, but also have a fair understanding of all its component parts. Then he can go off on long automobile tours, far and away from all service stations, and rest easy that nothing is going to occur at the wrong moment. "Of great importance is the motorist's knowledge of his battery's plates. He should study into the solid construction and great durability of the machine-painted plate which is a wide step in advance of the old hand-painted variety. If he knows his plates are sound he can rest assured that whatever troubles may be developed through wear in the other parts can be quickly remedied."

Many will remember Dr. F. A. Hall who used to live in Ashland. He was a retired railroad engineer, studied dentistry and practised here for a time. About three years ago he returned east and died recently at Baldwinsville, N. Y. The family were in Portland to attend the wedding of a brother. Mr. Pollock is a leading merchant of Yreka.

The Screen

"THE GLORIOUS LADY" AN APPEALING STORY

"The Glorious Lady," Olive Thomas' picture which began a three-day engagement at the Liberty theatre yesterday, is as novel as it is thrilling. The scenes are laid in England and the authors, Mary Murillo and Edmund Goulding, have been faithful to traditions. It was directed by George Irving noted for his perfect technique in stage-craft. In preparing his scenes the director has chosen his settings with rare discrimination, creating a picture that appeals to both mind and eye.

Miss Thomas brings all her beauty and charm and a new element of artistry to the role of Ivis Benson, the peasant girl who becomes the Duchess of Louine and never has she made a greater appeal than in this odd characterization. It is a part that calls for extreme delicacy and skill and the successful manner in which she carries the role is noteworthy.

"Should a Woman Tell?" is a very old question said to be answered in a very new way. Alice Lake, luminous-eyed, magnetic, and emphatically an actress with brains, is the young girl around whom the great question revolves. It is she who is brought face to face, as so many young girls are with the realization that even with all the modern ideas on the equality of the sexes there still remains old-fashioned ideas about the standard in morals.

A Christie comedy, "His Master's Voice," and a Bray Photograph are the added features of the program which opens today for a four day run.
