Fordson Farm Tractor

The Fordson cuts the cost of preparing land almost to half of what it costs with horses. But even more important is the fact that the Fordson saves from thirty to fifty per cent of the farmer's time. And time saved—getting fields in shape to plant in the proper season; getting things done when they should be donemeans money to the farmer. Besides it solves the labor problem.

As ever, the machine way is proving more efficient, faster, easier, than the old hand way. In the factory, the machine creases production, saves labor-produces more at less cost. And that is what the Fordson does on the farm. The Fordson way is the machine way of farming. Besides itsolves the labor problem.

The Fordson's first cost is thelowest in the market; and the after or operating cost is lowest. It is a compact, easily handled tractor, backed by the greatest tractor service organization in the United States.

We are Fordson dealers. Not only do we sell Fordson tractors, but we carry a stock of Fordson parts and employ Fordson mechanics to help the farmers get the best results from the Fordson.

Made by Henry Ford and Son and sold by
