

Cleanse Out the System and Get Ready for Spring

Nearly Every One Needs a Blood Tonic at This Season.

Possibly you are one of the thousands who cannot understand why a depressed, enervating feeling takes possession of the system as spring time approaches. If you are easily tired out, feel all run-down and have lost your energy and vigor, there is a very good reason for this condition, which you should lose no time in correcting.

Your body has brought you safely through the trying winter season, and in doing so has expended all of your stored-up energy which must now be replaced.

There has naturally been considerable wear on the system, and as spring time approaches, your body must be put back into condition. Any piece of machinery needs care and attention, and the human body is no exception.

Nearly every human ailment can be traced, one way or another, to impurities in the blood. And after a hard winter season these impurities have accumulated in the blood, and a thorough cleansing is of the greatest importance, as any slight disorder or impurity that creeps into the blood is a source of danger, for every vital organ of the body depends upon the blood supply to properly perform its functions.

Keeping well and enjoying the blessings of health is mainly a matter of resisting disease, and this depends largely upon the condition of your blood supply. If it is thin and impoverished, and has been allowed

to reach a low state by the accumulation of impurities, you have not sufficient vitality to resist the millions of tiny disease germs which are ready to attack you on every hand, and they will find a fertile field in your system to spread disease.

So, right now, probably more than at any other season of the year, you should take a thorough course of treatment to cleanse the blood thoroughly and put your system in good robust condition to be prepared for the coming of summer. And of course, you will want the best blood tonic that you can obtain.

More than a hundred years ago, the Indians made an excellent blood remedy, which was handed down to posterity, and has been sold regularly in drugstores throughout the land for more than half a century. This remedy is S. S. S., which is still made from the medicinal roots and herbs gathered from the forests, and is recognized as one of the most efficient blood tonics ever compounded.

A few bottles of S.S.S. just at this time will prove of great value in thoroughly cleansing the system of all accumulated impurities.

S. S. S. is without an equal as a general tonic and system builder. It improves the appetite, repairs the wear and tear on the system, and gives new life and a vigorous, healthy vitality. It is good alike for old and young.

You are invited to write for valuable literature and medical advice, which will be sent without cost. Address: Chief Medical Adviser, 186 Swift Laboratory, Atlanta, Ga. Adv.

NEW ALIBI IS PRESENTED IN L. EVANS CASE

The decision of Judge F. M. Calkins on the motion of Lark N. Evans for a new trial is expected to be rendered within a few days. The motion for a new trial was argued and submitted by Gus Newbury, attorney for Evans, last Saturday, based on affidavits of new evidence obtained by the defense, greatly strengthening the alibi testimony produced by the defense at the trial.

It will be remembered that Evans was convicted of the kidnaping and robbery of W. G. White, the Grants jitney man, and was given a sentence of 15 years in the penitentiary, which is being held in abeyance awaiting the outcome of the motion for a new trial.

The affidavits show that at the time the alleged crime was committed on Sept. 13, Evans was in Medford and was not in Grants Pass. The witnesses from Grants Pass testified that on the day of the crime Evans and his wife were in Grants Pass the whole of the afternoon and part of the forenoon.

It now appears from the affidavits filed by S. L. Sandry, the driver of the Blue Lodge mine car that the defendant was working on the Blue Lodge car that afternoon. The affidavit of Charles P. Talent, salesman, at the A. W. Walker Auto company, supported by the ledger of the company and the sale slips made on that date, shows that the defendant purchased certain articles in the afternoon about 3 o'clock. This is also supported by the affidavit of ex-County Clerk W. R. Coleman who was present when the purchases were made by the defendant.

The affidavit of a Portland woman shows that on that afternoon the wife of the defendant accompanied her to the Holland hotel at about 3 p. m. The crime is alleged to have taken place at about 5:30 p. m.

White testified that the car at Ft. Klamath was his car. The motor number of his car as shown by the office of the secretary of state is 280,248—the motor number of the car at Ft. Klamath, which White claimed on the witness stand as his bears motor number 360,746. The affidavit of D. H. Wilmer in whose custody the car is at Ft. Klamath states that the motor number on the car is the same as it was when it came from the factory.

The affidavit of Jerome Hilbert, superintendent of the Blue Lodge mine, shows that the bill of Hines & Snyder Auto Co. for September charges the Blue Lodge mine with a "test-out" made by Evans on Sunday the 14th, the day after the crime. Sam Sandry in his affidavit states that this test-out was made the day after the afternoon on which Evans placed the vacuum tank on his car.

The evidence of C. P. Krebs on the witness stand at the trial was that Lark Evans purchased groceries at his store at 5:30 on the evening of the 13th of September.

The affidavit of W. G. Kenney, who was city marshal of Jacksonville at the time the parties who committed the crime came to Reter's store at Jacksonville for gasoline, and those of J. B. Wetterer, E. H. Helms, and James A. Wilson who were also present when they drove up to get the gasoline, state that the defendant and his wife are not the parties who made the said purchases.

SEATTLE MAN IS ENTHUSIASTIC ABOUT TANLAC

"What I have seen Tanlac do for my wife convinces me that it is the grandest medicine in the world," was the statement made recently by J. T. Hickey, a well-known employe of Taylor Mill, who lives at 4828 Chicago St., Seattle, Wash., in telling of his wife's recovery while taking Tanlac.

"My wife has been in bad health for over a year troubled with a bad case of indigestion, nervousness, headaches and rheumatism," continued Mr. Hickey. "She hardly ever cared whether she ate anything or not and when she did force herself to take a few bites it would sour and cause her to have cramping pains. Gas would bloat her up so bad that it pressed up against her lungs and almost cut her breath off entirely. Her kidneys were badly disordered and all the time she was complaining of a pain in the small of her back. She had rheumatism in her sides and through her back that gave her no end of trouble and made it hard for her to get about the house. She was troubled with severe headaches and dizzy spells and her nerves were so upset that any little unexpected noise would excite her. At night she was so restless she could get but little sleep and as a result of all her suffering she was in a miserable run down condition."

"Our daughter had taken Tanlac and it had helped her so remarkably that my wife began taking it. It helped her right from the start and it looked like it was no time before she was able to eat anything she wanted and digest it without the least bit of trouble. The rheumatism disappeared entirely and the headaches and dizzy spells are a thing of the past. Her kidneys are in good condition and the pains in her back have just about gone and the nervousness has all left her. She sleeps sound at night and gets up feeling so fine every morning that it is an easy thing for her to do her housework. She has been built up in every way and is so much stronger that she looks like a different woman."

Tanlac is sold in Medford at West Side Pharmacy and by leading druggists in every town.

MILK CAMPAIGN IS ON THIS WEEK MEETING FRIDAY

From a survey taken of the Medford school children last year 33 1-3 per cent of them get no milk at all and with the prices of all foods going up it is indeed necessary that the percentage doesn't grow larger. Milk and leafy vegetables are the protective foods both in the diet of the child and adult and it is imperative that milk be in the diet of every Medford child if we are going to have stronger, healthier manhood and womanhood in the future. It is the aim in food crises to keep milk in the diet of every child in Medford. To this end the home demonstration department is carrying on in the city of Medford a campaign teaching the true value of milk as a food.

Watch for the window exhibits and read the literature on milk this week. Attend the big parent-teacher meeting, Friday afternoon, at which Professor Fitts of the O. A. C. will discuss the cost of the production of milk, and Miss Pool will discuss its food value and necessity in the diet. Then don't miss the pageant, "Milk Fairies," in the park, Saturday afternoon. Remember this week we are going to find out why we all should use milk.

In order to allow our employes a half holiday each week we have decided to close our shop at noon each Saturday beginning May 8 and continuing all through the summer season.

PROTECT HIGHER EDUCATION IN OREGON BY VOTING FOR THE HIGHER EDUCATIONAL RELIEF MEASURE ON MAY 21

DO YOU KNOW?

That since 1913 attendance at the higher educational institutions in Oregon has increased 150 per cent?

That classroom and laboratory space has increased only 15 per cent, so that conditions are "educationally impossible"?

And that their support from the state has increased less than FOUR per cent since 1913 when the present millage bill was passed?

That the purchasing power of their revenue from the state is less than one-half what it was in 1913?

That these three institutions, which now have 5400 full-time students, must reject hundreds if the bill fails?

That it will cost the tax-payer only \$1.26 per \$1000 of assessed valuation to protect the higher education of Oregon boys and girls?

LET OREGON DO HER SHARE. IF THE EDUCATION OF THE COUNTRY FAILS, THEN ALL ELSE THAT IS GOOD MUST FAIL. EDUCATION IS BOTH AN INSURANCE AND AN INVESTMENT. ALL STATES ARE EXPECTED TO CONTRIBUTE TO THE SUM OF HUMAN KNOWLEDGE

This advertisement inserted by Colin Dymont in behalf of Joint Alumni Relief Committee, 514 Pittock Block, Portland, Ore.

SERIES 20

Studebaker

BIG-SIX

As you ride in the BIG-SIX, you are won by the silent, steady pull of its 60-horsepower motor—and, when the throttle is opened, you feel the great resources of speed and power.

60-H. P. detachable-head motor; intermediate transmission; 128-inch wheelbase, providing ample room for seven adults.

All Studebaker cars are equipped with Cord Tires—another Studebaker precedent.
