THE PERFECT BAKING POWDER

How About Your Catarrh? Do You Want Real Relief?

Then Throw Away Your Sprays and Other Makeshift Treatment.

Why? Simply because you have overlooked the cause of catarrh, and all of your treatment has been misdirected. Remove the cause of the clogged-up accumulations that choke up your air passages, and they will naturally disappear for good. But no matter how many local applications you use to temporarily clear them away, they will promptly re-appear until their cause is removed.

S. S. S. is an antidote to the millions of tiny Catarrh germs with which your blood is infested. A thorough course of this remedy will cleanse and purify your blood, and remove the disease germs which cause Catarrh.

U. S. GOVERNMENT WANTS DIRIGIBLE LINE N. Y.—FRISCO

CAMBRIDGE, Mass., May 26.—A dirigible airship line to engage in regular passenger service between New York and San Francisco is a project in which war department officials would like to interest capital, with a view to having an air fleet immediately available in case of war, according to Professor Harvey N. Davis, of Harvard university.

Professor Davis is engaged in expert work on helium gas for the department, and is designing a plant to be built at Langley Field, Va., where the expensive gas after use in the military lighter-than-air craft may be washed free of impurities and used again. Estimates by Colonel William N. Hensley, of the war department, indicate that it will be possible for passengers to go by airship overland at a cost of about 5 cents a mile, at a speed of 68 to 70 miles an hour.

The advent of the airship as a passenger carrier is much nearer than many persons in this country realize," said Mr. Davis. "I shall be surprised if the coming summer does not see a line of airships in operation by an English firm between the United States and the British Isles and I have no doubt whatever that a year from now will see regular weekly sailings.

"By the use of helium all danger of disaster from explosions such as have wrecked big balloons filled with hydrogen will be averted. There will be no fear of ignition of the gas by bullets, lightning or sparks from the engine. In fact, it is pointed out, that the engines may be placed inside the outer shell of the dirigible, and that except for observation purposes no car need be carried outside the big bag."

While the present cost of producing helium is about ten times that of hydrogen, Professor Davis believes that development of its manufacture will result in a cheaper product. Helium will be used to furnish the lifting power in the \$2,500,000 dirigible which the navy department expects to obtain from an English manufacturer soon.

LATEST NEWS OF THE STATE

SALEM, Ore., May 28.—There are included in irrigation districts now organized in Oregon a total of 1,936,283 acres, of which 278,368 acres are actually under water at the present time, according to a report prepared here today by Percy Cumber, state engineer. Bonds voted for the development of these districts aggregate \$15,222,000 of which \$1,861,000 have been certified by the irrigation securities commission under a law passed in 1916. State guarantee of interest has been authorized on bonds amounting to \$2,600,000 and \$3,290,000 already has been expended in development of the various districts.

PORTLAND, Ore., May 28.—Pete Herman, world bantamweight champion, will be unable to fulfill his engagement to box in Portland on June 12, according to word received today by Matchmaker Bobby Evans of the Portland boxing commission. Herman, according to the message, has injured one of his hands, forcing him to call off all projected bouts for several weeks. Evans has not yet found an opponent to meet Benny Leonard, world's lightweight champion.

OREGON CITY, Ore., May 28.—Another destructive fire played havoc here early today, several buildings in the main business section of town being destroyed. Damage will probably reach more than \$25,000, according to estimates by property owners. The Portland fire department responded to an appeal for aid, but the fire was under control when the assistance arrived.

One fireman was slightly burned during the blaze. Four hundred telephones are out of commission today as a result of the fire.

Court Hall arrived home Thursday afternoon from Portland, for which city he went the evening of the primary election. He drove back from Portland in a new Chandler car.

KAISER TRYS HAND AS OWN TAILOR

LONDON, May 28.—William of Hohenzollern, former emperor of Germany, is trying his hand as a tailor, according to a Central News dispatch from Amsterdam. He is cutting out patterns for many new suits with which he is going to stock his wardrobe, and the dispatch quotes a trade paper as declaring he is "excelling at the job."

MEDFORD STORES TO BE CLOSED MONDAY

All of the stores in Medford will be closed next Monday, Decoration day, and therefore purchases should be made on Saturday to run until next Tuesday morning.

Decorations day being legally observed on a day following a day upon which all stores are closed, it is an inconvenience to the merchants to open their stores for half a day and therefore they will remain closed from Saturday night until Tuesday morning. By so doing, it will give opportunity to observe Decoration day in a manner most convenient to all. Arrangements have been made by many to visit the cemeteries in the morning and also attend the services of the U. A. R.

IMPORTANT MEETING RANCHERS TOMORROW

An important meeting of the Farmers and Fruit Grower's League will be held at the public library tomorrow afternoon at 2 p. m. Matters of extreme importance to all property owners, particularly fruit growers, will be considered and a plan of action outlined. The Farmers and Fruit-grower's League has done much to improve conditions for members in the past and with proper support can do even more in the future. Every rancher in Jackson county should make a special effort to attend this meeting.

Priced from **29¢ to 79¢**

M&M DEPARTMENT STORE

READ THIS!

AS IT WILL NOT APPEAR AGAIN

This week we gave you the opportunity to stock up your wardrobes by selling you goods and having them made AT COST PLUS 10 PER CENT

We have secured for you the highest grade tailors to the cheapest good tailors we could secure to do the work, and by cutting our profits to cost plus 10 per cent, has made clothing as cheap as good goods can be produced.

NOW DON'T EXPECT

Every merchant in Medford to sell goods on these terms, for it is not every merchant that cares to give away his time on an experiment. Now, the woolen market had a substantial break this week, but it seems to be only a flurry in the market, as all the advice we can get from the woolen market is that woollens will be higher from one to three dollars a yard for fall and winter. Again we say buy woollens while you can get them at wholesale price plus 10 per cent. We will make them up for you in any grade of work you choose, and if you do not like our system of work, we will sell you the woollens at cost plus 10 per cent and you can have them made of either one of our competitors, J. H. KUBER OR E. J. KLEIN, both good tailors, and if you don't like the tailors of Medford, there are five stores that sell clothing that, I believe, can and will sell you a suit now from three to ten dollars less than they can this fall. BUY NOW. Do not be like thousands of people who are now saying, "I wish I had bought sugar at eleven to fourteen dollars per," when their grocery man said it was going up.

THIS SALE CLOSSES SATURDAY NIGHT AT 9 P. M.

This week has demonstrated to us that a man cannot do business on a cost plus 10 per cent basis.

A Suggestion For Your Commencement Gift

The splendid Eversharp Pencil is the culmination of 400 years of pencil development. Here at last is a pencil that is always sharp—never sharpened, a pencil with enough lead to write a quarter million words, a pencil that is as much a wonder of beauty and construction as it is a marvel of writing.

We show a nice line in Sterling and Gold.
