Medford people contemplating auto trips north will be interested in the following in the Grants Pass Courier of Friday: "Shel and Calvert will start laying 'hot stuff' tomorrow morning on the Pacific highway between Rogue River and Grants Pass. In order that the work will not be interfered with, the road will be closed. No one without a special permit will be allowed to use the road and a special deputy sheriff has been appointed to arrest any one caught using it without a permit. The traffic will be routed over the road on the north side of the river which is said to be in good condition. The pavement being laid is to be of the bitulithic variety, the base being already laid."

Horace Bromley after lighting up his pipe and wielding his lead pencil handed in the following today to the unsuspecting city editor of the Mail Tribune: "One of the queerest musical instruments ever seen in these parts will be featured by the Imperial orchestra at the patriotic ball tonight. This oddity is a huge, antique saxophone nearly six feet in length and the only one of its kind in existence. It is said to have been first played by a wandering minstrel in the court of Henry the 5th, who was later beheaded because he was unable to play loud enough or long enough to please the king. Herb Alford will endeavor to play this huge saxophone tonight."

There will be one carrier delivery Monday and the postoffice will be closed all day except the general delivery window which will only be open from 8 to 9 a. m. The reason for the one delivery is that it is almost imperative, as Monday is the last day of the month, with its always heavy billing, and with no deliveries at all on Sunday and Monday there would be such a congestion of mail matter for Tuesday that the carriers could not handle it in time.

Lithia mineral water has great medicinal value. Phone 51. Jackson County Creamery.

There is a strong probability, it has been learned, that the federal trade commission inquiry into the charge against the Utah-Idaho Beet Sugar company will be resumed here next August, after the San Francisco, New York and Salt Lake City hearings, at which testimony will be heard for the defense. The commission party left today for San Francisco.

Have you tried the Lithia mineral water? If not call the bottling department of the Jackson County Creamery and get a sample free.

The hour for leaving for the basket picnic of the Elks and their families to be held at the lodge grounds on the Rogue river tomorrow is between 10 and 11 a. m. Eyes Made Equal

If your eyes are not working together—if one of them is unequal to its task—you are under a great disadvantage.

If your eyes are not serving you properly, everything you do will be worse than it should be—though seeming right to you.

Think what this means. How easily a reputation for skill may slip away from you and your earning capacity lessened!

You can only be at your best while both eyes are giving you their best service. If they are not, waste no time in hesitation, but call and let us make a careful examination.

Dependable Through Thick and Thin

Above everything else you want dependability built into the grain binder you buy. You want your binder to go into your grain fields, no matter what the conditions may be, and cut the grain with the least possible loss of time and grain.

We are selling the John Deere Grain Binder because we know it will give you that dependable binder service which makes it a profitable investment.

From the bottom up it's a better-built grain binder. Bigger and stronger roller-bearing wheels; heavier one-piece main frame widely lapped and hot-ripped together; strong rigid platform; three packers instead of two, assuring better bundles in all kinds of grain—these are just a few of the features that make it the better binder.

Another feature you will appreciate on this binder is the easily-operated bundle carrier. No effort to hold it in receiving position or to dump it. Because the teeth rise out of the stubble the instant you start to return the carrier, it's exceptionally easy to bring it back to receiving position. And it's no trick to keep this carrier always in easy-working order—simple adjustments are provided to accomplish this.

The Quick Turn Tongue Truck adds much to the effective work of the John Deere. The wheels turn faster than the pole, making clean, square corners possible. Because the truck axle is flexibly mounted, both wheels hold to the ground no matter how rough the field may be. This keeps the binder running straight, and takes off the side draft from the horses.

Come and see this binder. You can't make a better binder investment.
