Building Shoes Like Bridges-

Most shoes are just "made"-all that they are intended for are to be mere "foot coverings." The preservation of the foot is not taken into consideration.

That is where the ARCH PRESERVER SHOE and ordinary shoes differ. They are built on a basic principle-they have a wide bridge reaching from the ball of the foot to the heel, anchored securely in place.

It is this bridge that supports the arch gently yet firmly-it keeps it in its normal position and preserves the foot.

"Shoes built to a principle-Not mere Foot Coverings"

Happy New Year!

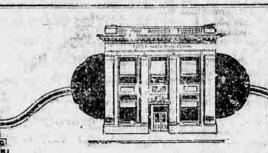

We're not going to tell you to start the New Year right-you'll do that anyway.

We just dropped in to wish you a healthy, happy and prosperous journey thru' 1921 and to add that those fine resolutions you've made would be easier to keep intact if you had a new suit and overcoat of our make to put on to-morrow morning,

> We'll be open at 8 tomororw and we'd like to start our new year by helping you start yours.

Symptoms May Not Mean What You Think They Do

Just its backache is not a symptom whatever of kidney frouble; and anomia is a result, not a cause of sickness; and an appendicitis pain may be felt at a place other than at the location of the appendix—just so some other symptom which you imagine is one thing may be the result of something entirely different.

Try to get medicine for yourself under the circumstances to invite danger—often fatal lilness.
Let the doctor know the symptoms—and locate the trou-

Then he can prescribe accurately,
Our part is to help him win by following his orders—EXACTLY.
