

BUY THAT CAR NOW!

The Bottom Has Been Struck in Automobiles as Well as in Many Other Lines, and the Tendency is Upward

The price of several makes of cars has already advanced this year and others are due for advance in the near future.

Automobile factories are only working on part capacity to supply present demands and when the spring rush for cars begins, which will be soon, you may have to wait several weeks to get the car you want as the factories

will no doubt be unable to supply the demand.

You remember how the demand exceeded the supply last year and many people were disappointed. Don't be in that class this year.

There is no reason why you should wait for that car and many reasons why you should **BUY NOW**.

Get ahead of the rush and be ready to enjoy the fine spring weather.
