

Local and Personal

The members of the executive committee of the Greater Medford club at their regular monthly meeting Monday voted to recommend to the city council the immediate purchasing of the Pacific & Eastern terminal tract for city park purposes. The sense of the meeting was that one of the greatest assets a city can have is a well located auto park, such as can be made by the purchase of this well located property. The well pleased tourist will do far more to advertise the city than tons of literature sent out to the various parts of the country.

Did it ever occur to you that with the two very efficient brakes on the 490 Chevrolet, they enjoy a freedom from accident that is lacking in some lighter cars? A certain amount of weight seems needed to keep motor cars safe and we are all being educated to a safety first attitude in all things. We must have weight enough in our cars to make the needed road friction to hold the cars when brakes are applied or we need speed laws limiting the rate of speed allowed the lighter cars.
