WHY CHILLY WEATHER BRINGS RHEUMATISM

Says skin pores are closed and uric acid remains in blood.

Rheumatism is no respecter of age, sex, color or rank. If not the most dangerous of human afflictions it is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lithia-water drink which overcomes uric acid and is beneficial to your kidneys as well.
