"There are about 10 billion feet of the best timber on earth, sugar and yellow pine, in this section, and all the minerals besides, and in addition a climate known as among the best. The Rogue River valley is really the Eden of the United States and the day is near at hand when the people of the east and middle west will flock to this territory looking for a home, so we may feel assured that Medford will get its share of these homeseekers. Hence it is up to every citizen to get interested, build a home and be ready to make money when the opportunity knocks."
