When a city like Minneapolis absorbs three solid trainloads of Buick Sixes in one month times can hardly be said to be very bad. Three-quarters of a million dollars for just one make of car seems a vast amount of money but it is really the result of more care in buying motor cars, more thought on what people get for their money, which is the real reason Buicks are so far ahead in sales in 1921. Purchasers are demanding the utmost in value. 33*
