

"Run Down" People Easy Prey To Serious Disease

When you get "run down" it merely means your system is disordered,—working poorly. If the disorder stays small, you may remain just "run down." But if it gets worse, you are downright sick.

Don't wait until your "run down" condition develops into real illness. Start today toning your system with an A-1 blood remedy to drive out the impurities, a vegetable medicine like S.S.S., which has served thousands thus in the last half century.

Get S.S.S. from your druggist right now. Then write us about your condition, addressing Chief Medical Advisor, 848 Swift Laboratory, Atlanta, Georgia. We'll send you medical counsel free.

A clever street venter selling patent collar buttons entertained hundreds of men today both before and after the parade by his entertaining line of talk from his stand beside the chamber of commerce building. He was not only a good salesman but a witty one, and his lingo and methods were somewhat new here. "Remember," he said in closing one of his demonstrations, "that full directions go with each package, printed in three languages, Chicago, Milwaukee and St. Paul, which any one that reads Oregon can understand. Please don't go away gentlemen. The parade is not due yet. Here is the best place to see it. It always stops in front of my stand, salutes me and then orders me away."
