

Local and Personal

Despite the large number of people to the city yesterday and the many local and outside areas, and the fact that these were two parades, one in the afternoon and the other in the afternoon, there was not the same amount of an accident or any trouble of any kind on Memorial day. The spirit of the day seemed to permeate into everyone a disposition to give their neighbors the right of way and maintain all thoughts of impudence. It was one of the quietest days in Medford history in the matter of handling a large crowd.

PRESIDENT LINDAS OUTLINES SCOPE SCENERY SOCIETY

Address made at the forum of the Medford Chamber of Commerce Wednesday, May 25, by President Lindas of the Scenic Preservation Association of Jackson County. Scenic Preservation. There are two ways of looking at every part of life. One, for instance, we have a historical who will date back many years ago of the past and give us a long record of dry details of battles and marches, of hardships and royal family trees. But at times these topics a historical and from the same uninteresting records he will weave a picture with words that thrill with life, until before your eyes will arise the happenings of another age, and you can see passing before you all the pomp and glory of yesterday. Here is a man walking down the streets of some teeming metropolis. He sees poverty and crime. He sees dirt and degradation. So he masses the crumbling houses together and calls them slums, and he masses the people together and calls them the submerged tenth. But at last there comes a Dickens and these same slums begin to glow with life, with love, with romance. Here is a man in the valley of the far west. He looks upon the snow-capped mountains and sees in them only rocks and stones to be blasted and quarried until they yield their National guarded treasures, who looks upon the tumbling cataracts and sees in them only engines of power to grind out dollars, and who looks upon the magnificent forests and sees in them only thousands of feet of lumber to be cut for the market. But there are other men to whom the white tipped summits reaching towards a sky of dazzling blue speak of thoughts far too deep for words, who are thrilled by the soothing music of the shimmering water falls, and who see in the green valleys, star spotted with purple and gold, a spark of the divine. Of course, we cannot all be poets, and the labor of life must be done though the beauties of life suffer for the problem. But every man has within him an innate love for the beautiful, a craving for higher things, and he is purer and higher and better as this part of his nature is permitted to expand and develop and grow. And so the Scenic Preservation Association seeks to minister to the aesthetic side of man's nature. It is not a new association, but an old association with a new name. It is an association that will be found in every civilization and in every nation. It is the result of the efforts of those who can see the ideal behind the real and who wish to preserve for future generations the spiritual qualities of material things. What are our parks? Scenic Preservation Associations. Who is it that guards the ruined Arctopols, who preserves the crumbling Forum, and who protects the Cathedrals of Europe? Who is it that inspires the U. S. to take over the mighty canyon of the Arizona, the frozen music of Mount Ranier, and the heavenly tiered wonder, Crater Lake, and make them into national parks? The ones who think it our duty to preserve the natural and man created beauty and scenery of the world. Preserve the scenic wonders of the west and it will make the American people a many sided people. Every one is influenced more or less by their environment, and the constant companionship of sublimity and beauty will give impulses and ideals finer and nobler than mere rush for material wealth. The Greeks in their Golden Age looked upon mountains and valleys, upon groves and sparkling streams, and their imagination was so touched that they peopled the forests with Nymphs and Dryades, and clothed their visions with gems of philosophy and literature. And so the American of today may look upon the matchless grandeur of the rugged west, and if these sublime scenes are preserved from generation to generation you will find from out of the west will come a literature that breathes a freedom of the hills, an economics founded on the simple duties of man to man as found in the life of the pioneer, a business as unselfish as nature in her most prodigal mood, a philosophy as exalted as the mighty sweep of the granite ribbed mountains, and a religion with the inspired simplicity of elemental things. Preserve these beautiful scenes of the west and in years to come millions from the teeming hives of the east will come out here to the nation's playground, to drink at your fountain of youth, to find themselves in the forest and hills, to renew their inspirations and brighten their hopes and to go back singing in the words of Lord Byron: There is a pleasure in the pathless woods. There is a rapture in the lonely shore. There is a society where none intrudes, By the deep sea, and music in its roar: I love not man the less, but nature more, From these our interviews, in which I steal

They never made a cigarette like this in my day—

The Camel idea wasn't born then. It was the exclusive expert Camel blend that revolutionized cigarette smoking. That Camel blend of choice Turkish and Domestic tobaccos hits just the right spot. It gives Camels such mellow mildness and fragrance! The first time I smoked Camels I knew they were made for me. I knew they were the smoothest, finest cigarette in the world, at any price. Nobody can tell me anything different.

TRUCK BURGLARS RIFLE 2 HOUSES

A bold burglary took place some time between late Saturday afternoon and this morning when the two partially completed dwellings being built on Minnesota Avenue by Dr. M. C. Barber and Roy Thomas, on the east side. From these houses two tool chests, one large containing \$100 worth of carpenter tools, and the smaller one containing \$100 worth of tools were taken, and three 100 pound kegs of white lead.

CO. FAIR PETITIONS MUST BE RETURNED

The immediate return of all petitions being circulated to call an election for county fair buildings and other improvements at the newly purchased fair grounds is desired. These should be taken to the office of the County Farm Bureau or the Chamber of Commerce. No further delay in placing the petitions before the county authorities is possible if the buildings are to be available this year. The law requires that forty days intervene between the filing of the petitions and the election. It will take some time to build the buildings and it is a well known fact that unless the building program is carried out there will be no fair this fall.

CATARHAL DEAFNESS MAY BE OVERCOME. If you have Catarrhal Deafness or head and ear noises or are growing hard of hearing go to your druggist and get a course of Paratin (doctor strength), and add to it a pinch of hot water and a little granulated sugar. Take 3 table-spoonful four times a day. This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throats. It is easy to prepare, costs little and is pleasant to take. Anyone who has Catarrhal Deafness or head noises should give this prescription a trial. Adv.
