

# Local and Personal

Tuesday in addition to being the longest day of the year was also the warmest day of 1921 so far, as the maximum temperature was 90 degrees reached about 5 o'clock in the afternoon. Most people if they had known it had been that hot would have suffered awfully, but as it was Medford's climate is so fine and agreeable that folks thought little about the weather except that it seemed a little warm. But those who overlooked discomfort yesterday through ignorance of temperature may have a chance to compensate for lost time during the next 24 hours, as the prediction of this morning says "Fair and warmer."

Hemstitching, pleating, Singer Sewing Mach. Co., 10 S. Fir St. Phone 215-R.

It's a Paramount.

**ARCH PRESERVER SHOE**

Building Shoes Like Bridges—

Most shoes are just "made"—all that they are intended for are to be mere "foot coverings." The preservation of the foot is not taken into consideration.

That is where the ARCH PRESERVER SHOE and ordinary shoes differ. They are built on a basic principle—they have a wide bridge reaching from the ball of the foot to the heel, anchored securely in place.

It is this bridge that supports the arch gently yet firmly—it keeps it in its normal position and preserves the foot.

"Shoes built to a principle—Not mere Foot Coverings"
