

PUT YOUR SHOULDER TO THE WHEEL

MEDFORD NEEDS MORE HOMES

We should put our shoulder to the wheel to help Medford and incidentally help ourselves. For a home is a mighty good investment, not only for the community, but as well for the man who builds it.

It is vitally important to you and to your town that you build a home. If you already own your own home, then build one for someone else to live in. You can make no safer or more satisfactory investment, and Medford needs more homes at once if she is to continue to grow and prosper. It's perfectly obvious that such crowded conditions can't be allowed to last very long if this city is to be a desirable place in which to live and transact business. A safe investment? Your house and lot are as safe as a bond. There is an unprecedented market now for property and that market is going to exist for years to

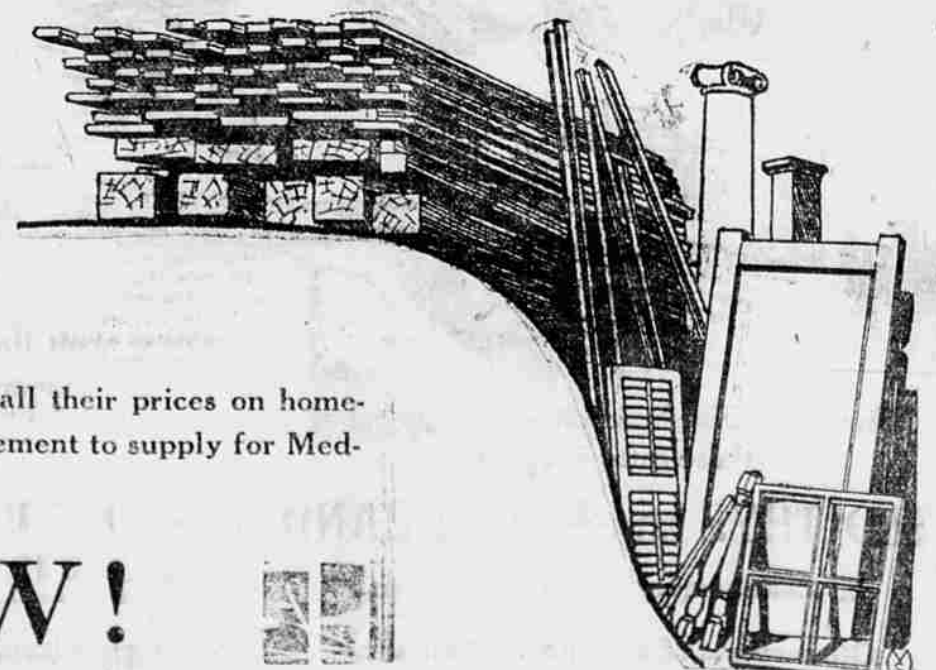

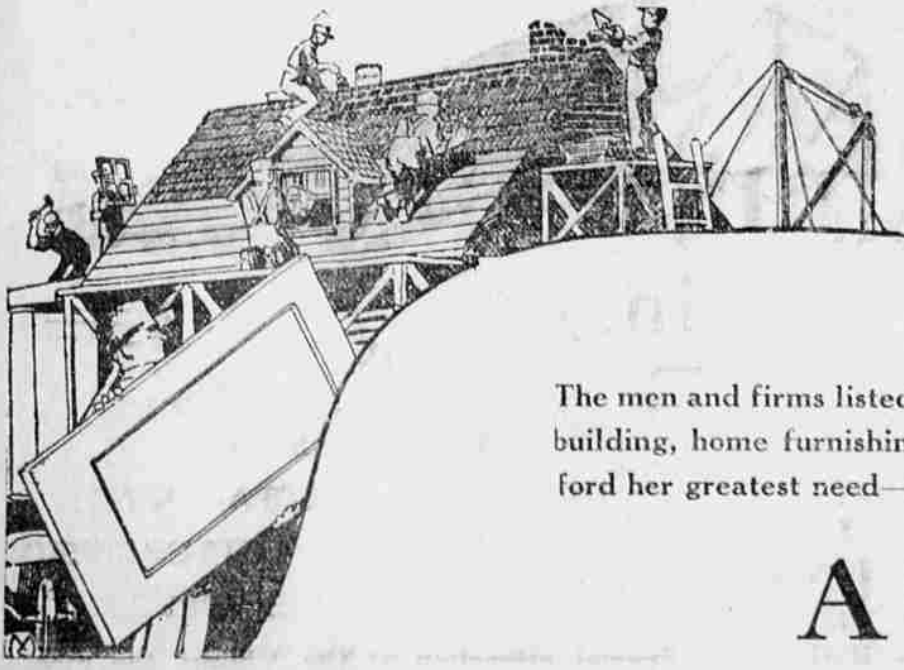

come. There are no indications that building prices will come down lower than they are now, but years hence, even though building prices should settle to a lower level, the tremendous building activity that must come in the meantime, will give your investment a substantial increase in value.

Put your shoulder to the wheel. There was never a better time from an investment standpoint. Help yourself and Medford. Build a Home—if not for yourself, then for some one else—but Build A Home.

GET AWAY FROM RENT WORRIES

Investigate the building proposition now. If you will give the matter the consideration it deserves you will come to the conclusion that it is logical to build now.
