One or two individuals are deriving satisfaction in knocking the Medford water supply with untruths circulated outside of the city. The local correspondent of the Portland Journal sent a telegram to that paper last Tuesday saying the burning Barnum hotel was doomed because of low water pressure, and an Ashland paper of the same date published a telephone message from Medford to the same effect. Chief Lawton, the firemen and most all of the thousands who witnessed the fire know that there was a plentiful supply of water, which was sent with all the force desired through the seven hose streams the firemen played on the flames. The firemen are unanimous in this declaration.

THE HUB

No More "Foot Frowns"

The woman who is on her feet knows the foot annoyance that comes late in the afternoon and evening from wearing regular shoes. She knows what it is to "suffer with well feet." This annoyance is often shown on her face by "foot frowns," as one woman wrote us.

Yet when she wears ARCH PRESERVER SHOES she can be on her feet as long as she wishes and not experience a single bit of discomfort. This is because the ARCH PRESERVER SHOE is built according to Nature's plans—affording a perfect support underneath the entire foot. The arch is not allowed to weaken or droop. Sandals, or moccasins without heels can not give greater comfort than the ARCH PRESERVER SHOE.

And the ARCH PRESERVER SHOE affords the style you wish. It is a stylish shoe that affords foot health. If you feet already have become weakened you'll find the relief by wearing ARCH PRESERVER SHOES.
