Will Stewart and Thel Thomas went to Eagle Point for some cattle Thursday and returned Saturday.

The school children and their teachers, Mrs. Winifred Stewart went for a walk Friday afternoon for their agriculture and nature study. The time was spent pleasantly and a great many interesting things were observed and discussed.

Sunday school and church as usual at Trail every Sunday.

Mr. and Mrs. Eugene Howell were at home to a few intimate friends Friday the 13th. Dinner was served at 5:30 p. m. to the following: Mr. and Mrs. John McDonald, Mr. and Mrs. Wm. McDonald, Mr. and Mrs. Thomas Todd, Miss Gladys McDonald.

I understand that the dance was not very well attended and there was evidence that there was some moonshine around as it became necessary for our town marshal to use his blilly on one man who became too boisterous. This is the second time the same man has had trouble at a dance at Trail, and been knocked on the head for his conduct. He may learn to behave himself properly after a while. Ladies who wish to take part and enjoy a social dance do not want to be harrassed by a half crazy drunken nuisance. There were a few dancers came to the Sunny-side to spend the latter part of the night, and among them was Mr. Hayman, formerly on the J. H. Cooley orchard but now of Phoenix, and Hurst Charley and Miss Nora Pankey of Medford.

G. E. Merrill of Derby, also spent the night, went to Medford, returning Tuesday night, and left here on the Butte Falls stage for his home. He is doing some trapping up in his neighborhood and meeting with some success.

The railroad men are having some trouble in repairing the road as when they ran over it a short time ago with their small locomotive they found the old ties were so rotten that the rails gave way with the result that when they were coming out with two or three small flat cars behind a Ford loaded with ties the rails gave way the second time and the result was they had to leave the ties and one of the flat cars and go to the repair shop, but they put on some more cars and are pushing the work right along and hope to be able to secure ties soon so that they can put on a full force.

It seems as though S. H. Harnish, one of our neighbors, has his share of troubles, for just a very short time ago I had to record the loss of a dwelling house by fire. He had it rented to two young men and he supposed that they were living in it, and no insurance, but he has not heard of or seen either of them since. And then last week he got up a cow to furnish milk for the family and tied her up by the neck leaving the calf beside her with a partition between them and in the morning when he went out to milk found her tumbled over with her neck broken.

In looking around for items of interest to write up for the readers of the Mail Tribune, I met Ray and Robert Harnish, just going over to their father's to move two mammoth Chester White hogs, taking them to better pasture. They are surely fine specimens of hogs, but the most attractive part of the outfit was the nine little rustling white pigs that Mr. Harnish had just weaned. I should judge that they would weigh about 25 or 30 pounds each and were as round as a barrel, but not so large. I am glad to see that the farmers are waking up to the necessity of raising a better breed of stock of all kinds, for a few years ago if a man wanted—a hog to fatten he would buy one a year old or such a matter and have to feed it for weeks or perhaps months before it would be ready for the block, whereas one can take one of almost any of the improved

stock, the Chester White, Duroc Red, Poland China and after feeding it properly for a week or so can make it take on from two to three pounds of flesh a day. I know of one instance when the late John W. Smith who lived on Big Stickey on the edge of the desert on the Eagle Point-Phoenix road took a small Duroc Jersey pig and made it gain at first $\frac{3}{4}$ to a pound a day and then two pounds and later three pounds a day until he got to be as large as he wanted him to be, weighing him every day. With a little care and attention one can improve their stock, I care not what kind or breed it is, and by crossing and breeding up can soon get rid of the old rascally breed of hogs, or the old degenerate stock of cattle and bring out a breed of beef or dairy stock.

Thomas Vestal and wife of Reese creek were transacting business with our merchants Saturday, and so was Fred Arnes and W. C. Pool.

J. W. Johnston of Medford, the business manager of the Kirtland Farm, came in and spent Monday and Tuesday at the Sunnyside. He seems to be on a deal with parties above here on Little Butte creek, to introduce a fine Percheron stallion in that section of the country. He went back to Medford this Wednesday afternoon.

EAGLE POINT EAGLETS

By A. G. Kowitz

Last Friday forenoon Miss Alwell Randall, Miss Ella Pettyman and Miss Anna Ray Conley, three of the Butte Falls teachers, called for dinner on their way to Rogue River to witness a game of basketball between the Butte Falls team and the Rogue River teams, and on Monday forenoon there were four young men came in. Prof. Ward Lawrence O'Brien, Ernest Abbott and Harold Patton, members of the Butte Falls high school, and remained until about noon and then went to the railroad track to meet Mr. George Albert who is running an accommodation train for the benefit of people who wish to travel in that way. He has a small motor car that he uses in that way and the people of Butte Falls and vicinity find it a very great convenience. They report that the Butte Falls team carried off the honors of five of the games out of seven, and in addition to other pleasures connected with the trip they had a very social time while in Rogue River.

It seems as though S. H. Harnish, one of our neighbors, has his share of troubles, for just a very short time ago I had to record the loss of a dwelling house by fire. He had it rented to two young men and he supposed that they were living in it, and no insurance, but he has not heard of or seen either of them since. Dentistry a Life and Death Problem

The condition of your teeth may mean a long life or an early grave.

Modern dentistry holds the highest rank in preventive medicine.

The object of a good dentist must be to prevent trouble and stop mouth disease.

Safer to Prevent Disease

It has been proven that it is better and a great deal cheaper to adopt measures for fire prevention than it is to fight fires and sustain losses on that account.

It is safer and better also to adopt measures for the prevention of mouth diseases.

Dentistry Insurance Against Disease

Disease lurks where bad teeth are found, and cleanliness should be taught in the homes and in the schools, and in all industrial institutions. Every measure should be taken against mouth infection.
