

There's Never Been a Peach Borer in Our Orchard

In some sections the peach root borer infests a large percentage of the peach roots in the nurseries. In some southern localities the dreaded Nematode or eel worm is a serious menace to peach roots.

In the nineteen years we've been growing trees at Toppenish, no one has ever discovered a borer or Nematode in any of our trees. The planter is entitled to absolute protection from all such risks. He gets it when he buys our trees. We use healthy, vigorous peach pits and bud on the resultant seedling, our peaches, prunes, plums, apricots, etc. You can't find better rooted trees than we produce on our clean, new Yakima Reservation soil.

Then our own growing of apple and pear seedlings are used for our own stock. We grow the entire tree on our own fresh, clean soil from the seedling root to the finished, budded or grafted tree, one or two years old. That's the way to insure satisfaction. Our customers' appreciation is found in an increased business every year.

We want your business, but we won't book your order if we can't please you. Your money would do us no good. There are some things worth more than money.

Ask us about the Wright Red Rome Beauty which is Rome Beauty in all particulars as to tree, bloom, bearing, ripening, keeping and shipping, but with a brilliant red coat.

GUS NEWBURY TO ENTER JUDGESHIP PRIMARY CONTEST

Attorney Gus Newbury of this city will file for circuit judge at the spring primary, according to an announcement today and with Charles M. Thomas, makes two avowed candidates for the position. Other names lurk in the background, including Attorney H. D. Norton of Grants Pass, as the entry on the democratic ticket. No official announcement of the entry of Norton in the race has been made, and it is generally conceded that the race on the Republican ticket is between Newbury and Thomas. Friends of Councilman T. W. Miles are urging him to enter the race, but he flat-footedly refuses. It is also political gossip that Attorney Newton Borden is not prone to make the race for the democratic nomination.

For the legislative places Ben Sheldon has announced his candidacy for the state senate, and Vernon Vawter and Ralph Cowgill are tentative candidates for the lower house.

For the county commissioner vacancy, now held by James Owens, the incumbent and Thomas Simpson of Ashland are mentioned. It is said that Ashland would rather have a representative in the county council than in the legislative halls. Owens has not announced yet whether he will be a candidate for re-election or not, but his friends say he will.

Dealing in the political future it is said that County Judge Gardner will be a candidate for secretary of state in 1924 and that William R. Coleman, former county clerk will be a candidate for sheriff the same year.

ARTICLE BY LOCAL SCHOOL TEACHER IS PUBLISHED IN EAST

Miss Ora Collins, first grade teacher in the Jackson school, has contributed an article to the Kindergarten and First Grade, which is a magazine of practical helps and suggestions for teachers of these grades, and is published by the Milton Bradley Co., of Springfield, Mass.

Miss Collins' contribution appears in the January issue, and is a full page illustrated article, showing an exhibit of first grade work.

The purpose of the annual exhibit of which she writes, is to show the patrons of the school some of the things accomplished by the primary pupils during the year. The photograph in the article is of her school room in Chillicothe, Mo., showing samples of the work done during each of the nine school months represented. In the pictures are children dressed to illustrate the work done or the people of different countries which were studied and the historical and seasonal events taught. The pilgrims are there, also the Japanese and Eskimos, Kit or Kat, the Dutch children, George and Martha Washington and others just as attractive and interesting.

The article will no doubt be of practical help to all first grade teachers who read it.

UNLICENSED DOGS WILL BE KILLED SAYS SHERIFF

The state law requiring licenses for all dogs within the county will be strictly enforced by the sheriff, and a dog catcher will be appointed to round up all canines. The licenses are procurable at the clerk's office, and a period of grace, not yet decided upon will be allowed all dog owners. After a dog is caught he will be held in the pound, and will be freed when the license is paid. If not, he will be executed. The license applies alike to city and country dogs. The fee is \$2 for male dogs and \$3 for females.

Relative to the killing of dogs, if no license is paid, Sheriff Terrill said he would have to, since the law had been upheld by the Marion county court.

Five hundred dog collars have been received by the county clerk, and a number have secured their licenses.

HARDING FAVORS CANAL

(Continued from Page One)

Industry, would be brought in communication with all ocean routes by the execution of the St. Lawrence waterway project. To enable ocean-going vessels to have access to all the ports of the Great Lakes, would have a most stimulating effect upon the industrial life of the continent's interior.

"The feasibility of the project is unquestioned, and its costs compared with some other great engineering works would be small. Disorganized and prostrate, the nations of Central Europe are even now setting their hands to the development of a great continental waterway, which connecting the Rhine and Danube will bring water transportation from the Black to the North Sea from Mediterranean to Baltic.

"If nationalistic prejudices and economic difficulties can be overcome by Europe, they certainly should not be formidable obstacles to achievement less arduous and giving promise of even greater advantages to the peoples of North America. Not only would the cost of transportation be greatly reduced but a vast population would be brought overnight in immediate touch with the markets of the entire world."

Suggestions Made.

The president, in an address touching upon the agricultural situation in detail, but without attempting to discuss the course of the conference discussions, outlined a half dozen broad questions. These briefly included:

Practical development of the water resources of the country, both for transportation and power, including plans for electrification of the nation's railroads.

Development of a thorough code of law and business procedure, with the proper machinery of finance, through some agency, to insure that turn-over capital shall be as generously supplied to the farmer and on as reasonable terms as to other industries.

Formation of co-operative loaning, buying and selling associations.

Creation of instrumentalities for collection and distribution of useful and true information so as to prevent violent fluctuations of markets. Methods for bringing about further reclamation, rehabilitation and extension of the agricultural area.

Promotion of a new conception of the farmers' place in the national social and economic scheme.

The president, who walked the four blocks from the White House to the New Willard hotel, where the conference is meeting, received a hearty ovation when he appeared in the conference hall.

The delegates and others in attendance, including a number of senators and house members, listened attentively, very strong applause greeted his declaration for more adequate credit facilities and applause also broke forth when the president made a slight digression to assert that the present condition in the agricultural industry is "truly of national interest and not entitled to be regarded as primarily the concern of either a class or a section or a bloc."

The president was followed by Secretary Wallace, who declared the conference had been called to consider the present agricultural depression and remedies for it, and also the laying down of a permanent policy for the upbuilding of a sustaining agriculture.

At the close of his address he announced that Representative Anderson of Minnesota, chairman of the joint congressional inquiry commission would act as permanent chairman of the conference and Dr. H. C. Taylor, chief of the bureau of markets and crop estimates as executive secretary.

Secretary Wallace told the delegates that constructive efforts might properly be made in three fields, which he outlined as follows:

"First—What may be done properly through legislative action.
"Second—What may be done through administrative and educational effort, national and state, by the various agencies, charged with the duty of fostering agriculture.
"Third—What may and should be done by the farmers, themselves, individually and through their organizations."

On the Jacksonville road about two o'clock Sunday afternoon for some unknown reason a Ford car, in which a man and woman and their two or three year old daughter, county seat residents, went off the road into the ditch about one-fourth mile this side of the turn, and overturned. The child suffered a badly bruised arm and sprained thumb, but the parents escaped injury beyond minor bruises. Jack Aitken of Medford, who was passing by, took the family home.

MEDFORD MAN TO AID IN REVIVAL J'VILLE BRICK CO.

Mr. J. J. Brophy, who recently purchased the old Roames home in the east end of town, made this office a pleasant call yesterday and informed us that arrangements have been completed for the establishment at Jacksonville this spring of the biggest brick and tile yard in the state of Oregon.

Associated with Mr. Brophy in the enterprise is Bert Childers of Medford, one of the best posted brick men and masons on the Pacific coast. He not only knows how to make the best brick and tiling to be had, but is also one of the best contractors and builders in the country.

Nearly all the machinery necessary has arrived at Medford and within a few days will be hauled to the site where the yard will be located,—just at the city limits in the south end of town.

Mr. Brophy informs us that at this location there is enough clay to build a brick city the size of Portland—the best quality of brick and the clay yet found in the United States outside of the world-famed clay of San Diego, Cal., where buildings built of this same kind of clay 200 years ago are still in good condition.

This will be the only first-class brick and tile yard between Albany, this state, and Redding, Cal., and there can be no doubt that it will require a large force of men to supply the demand, as their first kiln of 400,000 brick is already contracted for by Medford people and orders are coming in every day from many of the neighboring towns—Jacksonville Post.

SOUND TIRE CO. HOLDS CONTEST

The Sound Rubber company of Tacoma, Washington, is offering a prize of \$50.00 for a name for its exclusive process of rubber manufacture. The contest will close March 31. The Sound Rubber Co. is a northwestern concern which operates practically entirely in the northwest, producing a tire of unusually high quality adaptable to western road conditions. The campaign, which is being launched by this company is in the hands of the contest manager, Sound Rubber Co., Tacoma, Wash.

U. OF O. PRESIDENT FORUM WEDNESDAY

President P. L. Campbell of the University of Oregon is scheduled for an address at the forum of the Medford Chamber of Commerce next Wednesday.

This will be the second appearance of the university's president since the forums were started some two years ago. He always has an interesting story to tell and Medford people should interest themselves in the institution which he represents, which has a student body of some 2000.

The forum will be held at the Medford hotel at noon.

COUNTY Y. M. C. A. HAS BIG PHOENIX HIKE

Phoenix boys last Saturday took advantage of the fine weather to get out into the hills for the day. Leaving Phoenix at 9 a. m., the boys hiked across the valley east to the cliffs where some time was spent in looking over the curious rock formation. Erosion and weathering have carved out many interesting and grotesque shapes, there are caves and peculiar lava formations and haw's nests on shelving ledges which are inaccessible to anything without wings.

Each boy then showed his skill (if any) with the frying pan in his own behalf. All products of the skillet were adjudged "good" by the producer without much regard for the actual quality of the cooking.

After lunch the party went to the top of the range east, where a fine view was had. The boys returned about 5 p. m. Cash Wood was in charge of the hike.

POPE'S BODY LIES IN STATE

(Continued from Page One)

Cardinal O'Connell's voyage to Rome to participate in the election of a successor to Pope Benedict were announced today. With his official party consisting of Mgr. M. J. Splaine, the Rev. R. J. Haberlin, chancellor, and Dr. John R. Slattery, a layman, the cardinal will sail tomorrow from New York for Naples on the President Wilson.

He will have only eight days to reach Rome before the conclave opens, but will be admitted upon his arrival if the new pontiff has not been chosen. As Cardinal Dougherty of Philadelphia is in the West Indies, Cardinal O'Connell, for several days at least, will be the only American with a voice and a vote in the election of the new head of the Roman Catholic church.

BEN SCOVELL AT THE HIGH SCHOOL TOMORROW NIGHT

The famous actor-entertainer, Ben Scovell, will appear at the high school auditorium Tuesday evening, January 24th, at 8 o'clock.

Ben Scovell, is a nephew of the late Sir Henry Irving and son of the late Very Rev. Frank Scovell, dean of Siblebury, England.

With Irving he played in "The Merchant of Venice," "Macbeth," "Faust," "Louis XI," and "The Belle." He was with Wilson Barrett in "The Sign of the Cross," "Lights O'London," "The Silver King" and "The Manxman." With Mr. Richard Mansfield he played in "Henry V" and leading roles with other great actors and companies.

During the great war he acted as entertainer and cheerer of the soldiers and sailors of the allied armies and navies, in Belgium, France, Great Britain, U. S. A., Canada.

He is meeting with great success appearing before packed houses every where he goes.

The program is well balanced with gems from the classics and popular authors. Among the numbers are some of Mr. Scovell's own side-splitting humorous compositions, notably "The Football Match," and "When Mother's at the Club." The program will be interspersed with clever "skits" that produce uproarious laughter.

Some of Medford's leading musicians will also appear on the program.

Dainty Eaters Versus Hungry Hooligans at Crater Club Tuesday

The Craters club among other things is developing some fine table talent. Several of the members have become ambidextrous and wield their trenching tools from port to starboard with equal felicity.

Some of the eternally hungry Craters who can be depended upon in the gustatory mopping up process are Cole Holmes, John Goodrich, Hob Denel, Paul Janney and R. A. Mische. The more dainty eaters are led by Dr. Clancy and among their number are Frank Farrell, Vern Vawter, Dr. Elliott, O. O. Alenderfer and Lou Ulrich. Little can be expected of the latter group in a pinch although some of them have reputations as free hand eaters.

The next Craters banquet will be held at 6:30 tomorrow evening in the American Legion club rooms.

In Memoriam

In memory of T. M. Farrel, who passed away Jan. 24, 1921.

We miss thee from our home
Dear husband and father;
We miss thee from thy place,
A shadow o'er our life is cast.

We miss the sunshine of thy face,
We miss thy kind and willing hand,
Thy fond and earnest care,
Our home dark without you
We miss thee everywhere,
259 WIFE AND SON.

TANLAC
A SPLENDID TONIC AND SYSTEM PURIFIER

THE WORLD'S GREATEST TONIC
25,000,000 BOTTLES SOLD

Publicly Indorsed!

Tens of thousands of men and women throughout the United States and Canada, of all ages and in all walks of life, afflicted with stomach, liver and kidney disorders, some of them of long standing, as well as thousands of weak, thin, nervous men and women apparently on the verge of collapse, have testified publicly that they have been fully restored to their normal health, strength and weight by the use of Tanlac.

Still others, who seemed fairly well, yet who suffered with indigestion, headaches, shortness of breath, dizzy spells, sour, gassy stomach, coated tongue, foulness of breath, constipation, bad complexion, loss of appetite, depressed feelings, state that they have been entirely relieved of these distressing symptoms and restored to health and happiness by Tanlac.

That is THE REASON WHY the demand for Tanlac, the powerful Reconstructive Tonic and body builder, has broken all world's records.

Tanlac and Tanlac Vegetable Pills are sold by the West Side Pharmacy and by leading druggists everywhere.

A Sprayer Many Growers Have Long Wanted

This new Bean outfit meets the demand for a light-weight rig with plenty of power, high pressure, and big capacity. It delivers 12 gallons of liquid per minute at 300 pounds pressure. If that capacity is about right for you, then the sprayer you ought to have is a

"Bean" GIANT TRIPLEX

It has Bean porcelain-lined cylinders, the most satisfactory cylinders ever developed for a sprayer pump; threadless ball valves, which cannot corrode or stick tight and which can be opened up entirely in less than two minutes; Bean patented pressure regulator, which holds the pressure to the exact point desired, and saves much wear and tear on engine and pump; long-wearing eccentrics instead of cranks; and many other advantages, including the absence of stuffing boxes and stuffing box troubles. Sign and send the coupon, which describes entire Bean line for 1922.

HUBBARD BROTHERS
Corner Main and Riverside

The Bean Giant Triplex is equipped with the new 6 H. P. Bean engine, which can easily and quickly be made available for all kinds of power jobs. Ask about it.
