THE POOR THING!

(W. B. Maxwell Novel)

"Primrose, in another room, half undressed but still wakeful, feeling rather lonely and neglected too, was standing on a chair in front of the toilet table and looking at her legs in the small mirror.

During dull moments she often looked at her legs. From childhood they had been greatly praised by all privileged to see them. But that was the bother of it—one got so few chances of showing them, and to so few people."

THREATEN TO BUMP OFF OHIO MAYOR

YOUNGSTOWN, O., Jan. 25.—An armed bodyguard is staying close to Mayor George L. Oles day and night as a result of threatening letters received by the mayor, it was learned today. Reports have been current for a week that threats have been made by members of the lawless element to "bump off" Oles because of his activity in attempting to clean up the city.

20 Below in Michigan

SAULT STE MARIE, Mich., Jan. 25.—The thermometer dropped to 20 below zero here this morning and with the Straits of Mackinac icebound, Sault Ste Marie and the surrounding territory is virtually isolated from the rest of the state.

THEY BOTH WIN.

THE exclusion of the Japanese mainland, from the provisions of the Four-Power pact, is a political victory for the United States, but a real victory for Japan.

It is a political victory, because the opposition to the treaty in the senate, centered around the inclusion of Japan proper, and with its exclusion, this opposition will disintegrate.

It is a real victory for Japan, because by accepting exclusion of the mainland, she is granted the right of including the Bonin Islands in the mainland, which undoubtedly involves the right to fortify these islands to any limit desired.

The situation merely illustrates again, the folly of bringing domestic politics into international statesmanship. But for Borah and his followers threatening to take the stump if Japan were included, this concession to Japan regarding the Bonin Islands could have been avoided.

And the inclusion of Japan was merely a talking point. It had no reality in fact. If Japan proper should be attacked in the future, the parties to the four power pact, will meet to consider the situation, and will be as morally bound to prevent war, as if the Japanese mainland had never been excluded.

But as long as politicians continue to place personal advantage and pride of opinion above the larger questions of national welfare and international accord, these compromises and concessions must be made.

Practical statesmanship can't ignore the political hazard. In the world as it is today, idealism must yield to expediency if disaster is to be avoided and constructive results attained.

GETTING A DRINK.

"IF YOU are thirsty, follow me," the bootleg merchant said, "I said he, and down an alley dark he went, a stealthy and a furtive gent. By refuse heaps he led the way, through empty cellars, foul and gray; "if you are thirsty," whispered he, "look out for dicks and follow me." The thirsty patron followed on, with visions of a demijohn, through noxious mews and noisome slum, intent upon a slug of rum. And by the city dump they stopped, and from a jug the stopper popped. A beaker of the booze he took; his vitals it began to cook, and clouds of bluish smoke arose, emerging from his ears and nose. He cried, "I've had my forty drops! Now watch me whip the village cops! I feel like Samson when he slew a lion or a kangaroo!" And when the sun rose, bright and red, two cops were sitting on his head. And others beat him on his soles with heavy lignum vitae poles. Also for poor deluded skates, on whom such black disaster waits, who follow through the shadows gray, where bootleg merchants lead the way! Oh, come with me to yonder fill, and drink and drink, and drink your fill!"

BROWN COLLEGE BUILT BY WEST INDIA RUM

PROVIDENCE, R. I., Jan. 25.—West India rum, some of it "very good and old," played a large part in the construction of Brown university, according to university historians. They have just discovered among the early records a bill for liquors which grew rapidly as the first building rose. The last three gallons were used to raise the roof. Tradition relates that at the laying of a cornerstone in 1779, John Brown, merchant, treated the crowd liberally to punch, and the accounts show that what began at the cornerstone, continued through the entire time of construction. CONTROL DETROIT TRAFFIC BY ONE TOWER, 4 MILES

DETROIT, Mich., Jan. 25.—A new system for control of traffic in the congested part of Detroit that is said to contain a number of features heretofore untried, and that will result in control of traffic over a distance of four miles from a single tower, will be put into operation here about February 1, it is announced by Police Inspector Harry H. Jackson. The plan is an enlargement of the system now in vogue here. It provides for placing a great master tower at Woodward and Michigan avenues. By means of bells and lights a single officer in this tower will direct traffic from Detroit river to a point four miles from the heart of the business district on Woodward avenue. All vehicular traffic in the congested district will move or stop in unison upon signal from the master tower. The signals will be repeated automatically in subsidiary towers, two of which are to be placed at each street intersection. Traffic officers will be relieved of giving signals, under this plan, and will be able to devote their attention to seeing that traffic laws are obeyed.

FLEXIBLE TARIFF IS ENDORSED BY U. S. CHAMBER C.

WASHINGTON, Jan. 25.—Legislative provision for flexible tariff rules to be administered by a tariff adjustment board having "quasi-judicial" functions is included among other tariff recommendations which the chamber of commerce of the United States has been committed by referendum vote of its membership, it is announced. Other propositions adopted in the referendum were "reasonable protection for American industries in restrictive competition," "maintaining of the anti-dumping principle," "encouragement of export trade" and adequate tariff measures to meet foreign discrimination. The vote on the question of the American valuation basis for levying duties was announced as 979 for and 833 against, lacking the necessary two-thirds majority to commit the chamber either way. The purpose of the proposed tariff adjustment board, it was said, would be to provide a consistent tariff policy in the fact of fluctuating trade conditions and its tariff rate decision, although limited in range by congress should "become as effective and binding" as duties now fixed by legislation.

IRISH DRUMMERS RUSH TO DUBLIN

BELFAST, Jan. 25.—News of the raising of the boycott by the Irish free state against Ulster caused a rush of commercial travelers today to various railway stations enroute to various points in south Ireland, anxious to resume the business which the boycott had checked.

PARIS, Jan. 25.—(By Associated Press.) Resolutions of condolence over the death of Pope Benedict were passed by the world congress of the Irish race immediately upon its assembling here. Taking up the questions before it, the congress considered and passed a resolution deprecating "the vindictiveness of Great Britain in retaining Irish prisoners in British jails."

IT'S DISHONEST TO POWDER NOSE, SAYS MISS BOOTH

SAN FRANCISCO, Cal., Jan. 25.—Women who powder their noses, touch up their hair with a lot of golden gilt or add the bloom of youth to their cheeks are positively dishonest, Evangeline Booth, national commander of the Salvation Army declared while here recently. Women use "makeup" to deceive, Miss Booth said. "A woman has no right to fool the world," she added. "The woman with blushing cheeks, indigo eyes and curly hair is a cheat." Many divorces are caused by the fact that women have attempted to deceive their husbands regarding their appearance, she thinks. Man, she added waits women as nature intended they should be. The enormous sale of cosmetics in the United States is a disgrace to the country, Miss Booth feels. "If our young women of today would only take the money they use for paint and powder, and buy milk for the poor, starving babies of the world, they wouldn't need any artifice to make themselves attractive," she said. "In their cheeks would be the hue of joy that comes from the heart and in their eyes the light that comes only from giving service to the world." Miss Booth thinks moderation and utility should be the guide when it comes to clothes. Following the style of the Salvation Army, she says, skirts should be five or six inches above the ground. "Too many women today destroy their true womanliness by immodest dressing and they have only themselves to blame when their characters are questioned," she asserted.

PREDICT GALES ON THE OREGON COAST

SAN FRANCISCO, Jan. 25.—South-west gales, lashing the coast from Cape Mendocino northward, accompanied by rain or unsettled or threatening weather will break the cold snap's grip on the Pacific during the next 24 hours except in southern California, according to the forecast of the United States weather bureau here today. A strong blow reaching gale force on the Washington and Oregon shore lines is on the program for tonight and tomorrow.

A. BARTON HEPBURN IS KILLED BY N. Y. BUS

NEW YORK, Jan. 25.—A. Barton Hepburn, financier, author and economist, died here this morning. On Friday he was struck by a bus and suffered a compound fracture of his right leg, but at the time attending physicians did not believe his injuries were of a dangerous nature. Later, however, Mr. Hepburn's condition underwent a change for the worse, becoming critical yesterday morning.

Anti-Suffragettes Threaten Revolution If Measure Stands

WASHINGTON, Jan. 5.—Oral argument in two cases brought to test the constitutionality of the nineteenth or woman suffrage amendment, was concluded today in the supreme court. Certain individual women suffrage leaders who were permitted to intervene, contended through their counsel, George M. Hirsby, that the amending power had been validly exercised.
