You can't fool the youngsters. They can always tell the difference between KELLOGG'S and imitations.

Kellogg's Corn Flakes snap up fussy appetites something wonderful!

No coaxing needed to tempt family folks and visitor folks to eat a plenty—not when there's a big pitcher of milk or cream and lots of Kellogg's Corn Flakes—and, maybe some fruit—ready to tickle fickle palates!

Kellogg's are unlike any corn flakes you ever ate! They're the original kind—they ought to be best! No other corn flakes are so deliciously flavored; no other corn flakes retain such wonder-crispness till eaten! And Kellogg's are never leathery or tough or hard to eat!

Kellogg's are always a delight to serve—and a treat to eat at any meal! In fact, you'll never know how good corn flakes can be until you know KELLOGG'S!

Do more than ask for corn flakes—say KELLOGG'S CORN FLAKES! The kind in the RED and GREEN package!

COMB SAGE TEA IN FADED OR GRAY HAIR

If Mixed with Sulphur it Darkens so Naturally Nobody can Tell.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful. This preparation is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.
