FONGET A FAIR TAX.

NCREDIBLE! According to reports from Portland they are stil I talking about a state tax for the 1925 exposition.

There is about as much chance of passing a state tax for a fair in Pertland, as of passing a state tax for an oil well in Crater Lake.

The idea is preposterous. The only possible way, and the only proper way to finance a world's fair in 1925 is by popular subscription. If there are enough people in Oregon, willing to pay for a fair. well and good, the fair should be held, if there are not, the fair should not be held.

The only way to find out is to try. A stock selling scheme has been suggested, and this method is probably as good as any. Let the people who want a fair pay for it. Let those people who don't want a fair be relieved from any financial obligation.

True, if the fair is a success, the entire state will benefit, but the venture is too much of a gamble, and the tax situation in this state is too critical, to justify making such a venture a public obligation.

The tax levy in Oregon for all purposes and in all districts in 1913 was \$18,313,468; in 1920 it was approximately \$32,000,000, and in 1921 approximately \$41,000,000.

Bonds, in other words, public debts voted by the people of Oregon and its political subdivisions, total the vast sum of \$158,930,892. This sum is equivalent to 15 per cent of the assessed valuation of the state. The interest charges annually upon this debt amounts to about

The increase in the state's valuation in the last ten years has been 17 per cent, the increase in population about 9 per cent, but the increase in taxes 244 PER CENT.

With such a situation in this state and with the comomic conditions in this country and the entire world as they are, it is impossible to understand how any sane person, nruch less any good business man, sunder oil are length of burning time objectionable. can seriously consider tacking four or five more millions upon the residue left in pot-especially asphal- left a layer of asphaltum in the School tax payers of Oregon, to construct some papier mache buildings in tum, and price of oil, There are a 1000 American "experts 1925 which will be thrown on the ash heap in 1926,

W HEN I paid up my income tax, a few brief days ago, some wild alases and alacks I uttered in my woe. I had to pay a frightful sum, a tribute much too vast; for I have to earn my scanty rocks by long and patient toil, by packing sonnets in a box and burning midnight oil. And'so it jars me when I find how great a goat I am; the product of my weary grind must go to Uncle Sam. I said, "I'll seek some other land, some quiet place abroad, where tax collectors do not stand and rob man of his wad." I tried to locate such a shore-there's no such place of bliss; in other lands they tax men more than we are taxed in this. A poet on a foreign strand who earns three bucks a day, would find an officer at hand to take two bucks away. However, great our griefs may be, however fierce they seem, they're twice as bad across the sea, where eagles do not scream. So let us bear our trifling load and cease to tear our hair, and gambol up and down the road, our coattails in the nir.

Result of Tests of Smudge Oils and Orchard Heaters

By F. C. Reimer, Experiment Station, Talent, Oregon. Great interest is being manifested in orchard heating this season, and more

chobardists will smadee this year than ever before. Recently samples of oil for orchard heating were obtained from the various oil companies and tested at the Southern Oregon Experiment Station. The results of this test have been tabulated and are presented in the following

Name of all	Gravity	Bucaing Time		Box	Sahes	Aspi Rest Sand
