COAST R. R RATE CASE BEING HEARD IN SAN FRANCISCO

SAN FRANCISCO, April 28—A hearing intended to adjust rate questions arising out of rail and water competition on the Pacific coast is being held here before Henry C. Keene, examiner for the inter-state commerce commission. The hearing was based upon petitions of the rail carriers seeking authority to continue in effect the existing class rates between San Francisco and Portland that are lower than the rates to direct intermediate points and to continue in effect existing commodity rates modified only to the extent necessary to meet the existing water competition.

The carriers are seeking to raise intermediate rates only where competitive conditions tend to compel such increases, according to the petition. No change is sought in rates not directly affected by water competition.

There is involved in the hearing the rail rates between Los Angeles, Wilmington, San Pedro, San Francisco and Oakland on the one hand, and Portland, Tacoma, Seattle and other points in Oregon and Washington on the other. Also, the rail rates between San Francisco and Oakland and other points in central California and Los Angeles, San Pedro, Wilmington and San Diego and other points in southern California and the rail and water rates between San Francisco and Oakland and Seattle and Tacoma and their related hauls between Seattle, Portland and Tacoma also are affected.

The Southern Pacific company is of the belief that the hearing will decide whether the rail carriers will be permitted to continue to haul several valuable items in the face of the water competition.

The changes asked for are slight, according to the Southern Pacific and will involve increases and reductions both in the terminal and intermediate rates.

CRUST MOVEMENT N. CALIF NOTED

WASHINGTON, April 28.—Recent indication from astronomical sources of a "northward crustal movement of small magnitude in northern California," has led a cooperative study by the scientific bureaus of the government and the Carnegie institution of aWshington to gather precise dta on the subject, it was revealed in a paper read today before the meeting of the national academy of sciences by Dr. Arthur L. Day, director of the geophysical bureau of the institution.

"The suggestion has been made," Mr. Day said, "that the accumulated strains produced by such movement eventually produce rupture and an elastic recoil of earthquake."

It is a part of the program of investigation he said not only to locate the surface displacements, either gradual or disruptive, but also to develop instruments and establish locations for the location of sub-surface zones of movement.

TWO SUICIDES EVERETT, WASH

EVERETT, Wash., April 28.—John Lundeen, aged 63, owner of a summer resort on Lake Stevens near here, waded out into the lake and shot himself. When search was made for him his body was found by a son lying in the shallow water of the lake. Ill health is supposed to have been the cause of the suicide.

EVERETT, Wash., April 28.—An attempt is being made to identify the body of an unidentified man washed ashore on the beach near Edmonds. The features were mutilated from pounding on rocks. It is thought it may be the body of Karl Karlson, fireman who early in the year is believed to have jumped off the steamer Waikema near Mukilteo.

MURDER MYSTERY YOSEMITE PARK

YOSEMITE, Cal., April 28.—The partially cremated remains of an unidentified human being, believed by Dr. Frederick Stein of the Yosemite medical service to be a woman, were found in a locked black enameled steel box near the foot of Yosemite falls yesterday. The box contained ashes, small bones and seven teeth.

National park rangers are investigating, suspecting foul play.

The box was found by Ranger Reed and its partly concealed position indicated that the burial must have been a hasty one. The theory is being entertained that the person burying the box was interrupted before he could complete his work.
