As to the depth of snow at Crater Lake national park Superintendent Sparrow has received information that on April 20th there was 14 feet at the lodge at the rim, and 8 feet and five inches at Anna Spring camp, five miles lower down. This depth is about three inches less than at the same date last year. With warmer weather the snow will begin to disappear fast, probably leaving the usual small quantity remaining when the season officially opens, July 1st.
