Notice to Exterminate Ground Squirrels

Every person, firm, co-partnership, company or corporation residing on, owning, leasing, occupying, possessing or having charge of or dominion over any land, building, wharf, or dock in Jackson County, Oregon, is hereby notified to begin at once to effectively exterminate and destroy all such digger ground squirrels.

The following poison for mixing and instructions for use thereof is the method most expedient and effective to be used for the extermination and destruction of such ground squirrels and is hereby recommended, to-wit: alkaloid strychnine used on either barley or wheat, barley preferred, mixed according to the following formula and manner, to-wit:

Barley, clean grain 16 quarts
Strychnine (powdered alkaloid) 1 ounce
Bicarbonate of soda 1 ounce
(baking soda) 1 ounce
Thin starch paste 1/2 pint
Heavy corn syrup 1/2 pint
Glycerine 1 tablespoonful
Saccharine 1-10 ounce

This material should be mixed as follows: Mix thoroughly 1 ounce of powdered strychnine (alkaloid) and 1 ounce of common baking soda. Sift this into 1/2 pint of thin hot paste and stir to a smooth cream; mass (The starch paste is made by dissolving 1/2 cup of starch in a little cold water, which is then added to 1/2 pint of boiling water. Boil and stir constantly until a clear thin paste is formed.) Add 1/2 pint heavy corn syrup and 1 tablespoonful of glycerine and stir thoroughly. Pour this mixture over 16 quarts of clean barley and mix well so that each grain is coated.

One quart of the poisoned grain mixed as aforesaid is sufficient for forty or fifty baits and this quantity scattered along squirrel trails or on clean hard places on the surface about the holes will not endanger stock. Strychnine in any form other than the powdered strychnine (alkaloid) is not effective in the above formula.
